

THE GARDENS OF VERSAILLES

Celebrated landscape architect André le Nôtre originally laid out the extensive gardens for the palace at Versailles, with fountains, an orangery, graveled walks, and an ornamental canal. His work is considered the supreme masterpiece of the formal French garden style. Various changes were made to the grounds over time. King Louis XVI gave his queen Marie Antoinette her own château on the grounds, the charming Petit Trianon. She also had a fake hamlet constructed in which to act the part of a shepherdess.

In Louis XIV's day, the palace was crowded with up to **7,000** courtiers and servants
