

October

10

Also on this day

1967 An international agreement called the **Outer Space Treaty** – originally signed by the USA, the UK, and the Soviet Union – came into force. According to the treaty, the Moon and other bodies in space can be used for peaceful purposes, including space exploration, by all countries. It doesn't allow any country to claim ownership over anything in outer space.

2013 The world's first drone that could be activated and flown by winking was unveiled in St Andrews, Scotland. It was developed by Peruvian inventor Katia Vega.

1964 An Olympic first

The 1964 Summer Olympic Games began in Tokyo, Japan. This was the first time an Olympic event was held in an Asian country.

1903

Suffrage for all

British activist Emmeline Pankhurst founded the Women's Social and Political Union (WSPU) in Manchester, England. The organization fought for women's right to vote through demonstrations, marches, and strikes.

Off with their heads!

French physician Joseph-Ignace Guillotin proposed that death penalties for criminals should be carried out painlessly. His idea led to the creation of the guillotine – a device with an angled blade that, when dropped on someone's neck, killed them instantly.

1789

Born this day

1970 **Matthew Pinsent**, British rower. In his 17-year career, he won 10 rowing world championships and four Olympic gold medals.
