Taking over

Spanish *conquistador* “conqueror” Francisco Pizarro entered Cuzco, the Inca capital. He soon captured Inca leader Atahualpa, which marked the end of the Inca Empire. He later formed the first Spanish settlement in Peru.

Born this day

1981 Lorena Ochoa, Mexican golfer. Considered the best Mexican golfer of all time, she was ranked highest in the world for 158 weeks from 2007 to 2010.

1971

Pioneering processor

The world’s first microprocessor – the Intel 4004 – was released in the USA. As a crucial “building block” in electronic devices, it revolutionized the way people used computers.

Power up!

The first dry cell battery was patented by German inventor Carl Gassner. A commercial success, it didn’t spill its chemicals as previous types did. This reliable battery is similar to the carbon-zinc combination used today.
