

1896

Speed demon

The first person convicted of a speeding offence was Walter Arnold from Kent, UK. A police officer chased him down on a bicycle and gave him a one shilling fine (around £4 in today's money) for breaking the speed limit of 3.2 kph (2 mph). He was driving at 13 kph (8 mph).

Also on this day

1671 Plundering pirate **Henry Morgan** and his army of 1,500 men raided Panama, seized its capital city, and stole its national treasures.

1871 The German states led by the Kingdom of Prussia finally defeated France at Paris, ending the Franco-Prussian War.

1986 Space Shuttle *Challenger* broke apart 73 seconds into its flight when a booster engine failed. All seven crew members died.

1951

Seabird sighting

Previously thought extinct, the cahow seabird was spotted on the Pacific island of Bermuda by local teenager David Wingate, who later became a conservationist.

Build with bricks

The Danish LEGO® Group submitted the patent for its “toy building element”. Interlocking LEGO® bricks are still based on this original patent, with about 75 billion pieces sold every year.

1958

Born this day

1608 **Giovanni Alfonso Borelli**, Italian scientist. He is known as a pioneer of biomechanics – the study of the structure, function, and movement of a living organism.

1912 **Jackson Pollock**, US abstract expressionist artist. He created paintings by pouring or splattering paint from above.
