

**THICKEST
SKULL**

The spikes around *Pachycephalosaurus*'s dome may have been for display or defense.

STATS AND FACTS

Pachycephalosaurus's skull was thicker than those of other dinosaurs. At 10 in (25 cm) thick, it was also about 40 times thicker than an average human skull.

WEIGHT

A fully grown *Pachycephalosaurus* would have weighed about 1,076 lb (488 kg).

SPEED

This dinosaur's speed at impact would have been 15 mph (24 kph).

The hard beak helped *Pachycephalosaurus* pick off low-lying vegetation.

**One fossil of a
Pachycephalosaurus
skull was found with
23 injuries.**

Pachycephalosaurus would have had scaly skin.
