

Arkel Expands Manufacturing Footprint in India Under Innovalift AB Leadership

Our new facility at Savli-Manjusar marks Arkel India's transition into advanced domestic manufacturing of elevator control systems.

On February 26, Arkel Electronic India Pvt. Ltd. inaugurated its new state-of-the-art manufacturing facility at Savli-Manjusar GIDC Estate in Vadodara, Gujarat, marking a transformative milestone in its India growth journey under the leadership of Innovalift AB.

Developed with a Phase 1 investment of approximately ₹100 crore, the 1,35,000 sq. ft. facility signals Arkel India's strategic transition from marketing advanced lift electronic systems to manufacturing them domestically. With a planned production capacity of 36,000 units annually in a single shift, the plant is positioned to address the rapidly expanding needs of India's elevator

and infrastructure sectors while reducing reliance on imports.

A key advantage of this local manufacturing capability is the ability to produce electronic systems fully compliant with the new IS 17900 Standard. With this achievement, Arkel becomes the only local "Made in India" electronics supplier — starting from PCB to drive manufacturing, everything is produced in-house — currently meeting the latest lift standards and setting a new benchmark in regulatory compliance and safety within the Indian vertical transportation industry.

The advanced manufacturing unit will feature automated PCB assembly

lines, semi-automatic MR control panel lines, and integrated lift control systems, including MR, MRL, and slim panel solutions. Designed with controlled temperature, humidity, cleanliness protocols, and electrostatic discharge management systems, the facility adheres to global electronic manufacturing standards. Its IoT-enabled, energy-efficient systems are tailored to meet the evolving demands of high-rise residential complexes, commercial towers, healthcare institutions, retail spaces, transit hubs, and public infrastructure projects.

A Grand Inauguration Ceremony

The inauguration ceremony reflected the scale and significance of the milestone. The ribbon-cutting ceremony led by Chief guests of the event- Mr. Andrea Veggian, CEO, Innovalift AB; Mr. Metin Cenk Ceylan, CEO, Arkel Elektrik Elektronik A.Ş., and Mr. TAK Mathews, Principal Consultant at TAK Consulting formally inaugurating the facility.

The ceremonial lamp lighting was done by chief guests along with Mr. Korhan Cetinsarac – CFO Arkel Elektrik Elektronik A.Ş., and Mr. Vadiraj Katti, Managing Director, Arkel Electronic India Pvt. Ltd. which symbolized the beginning of a new era of innovation and manufacturing excellence. On behalf of Arkel India, the opening session was addressed by Mr. Vadiraj Katti, Managing Director, Arkel Electronic India Pvt. Ltd. On this occasion, a presentation delivered by Dr. Abhijeet Joglekar, Sales Head-Arkel Electronic India Pvt. Ltd. regarding the "Journey of Arkel India". This journey touched the past, highlighted the present and explored the future. During the closure, Mr. Mitesh Vyas – HR Head Arkel Electronic India Pvt. Ltd. offered a vote of thanks.

The ribbon-cutting ceremony led by Mr. Andrea Veggian, CEO, Innovalift AB; Mr. Vadiraj Katti, Managing Director, Arkel Electronic India Pvt. Ltd.; Mr. Metin Cenk Ceylan, CEO, Arkel Elektrik Elektronik A.Ş., and Mr. TAK Mathews, Principal Consultant at TAK Consulting, at the newly inaugurated manufacturing facility in Vadodara, Gujarat.

The event contained by keynote addresses from chief guests, who shared the group's global vision and long-term strategic roadmap. The top leadership underscored the
