Global Micro LED Revenue To Double To \$105.4 Million In 2026

Micro LED display revenue is forecast to double from \$52.4 million in 2025 to \$105.4 million in 2026, with long-term growth projected to reach \$6.8 billion by 2032. Growth is driven by mass production of TVs, public displays, and smartwatches, alongside rapid adoption of LEDoS technology for ultra-small, high-resolution AR/VR displays and specialised applications requiring brightness, transparency, and flexibility.
