

India's smartphone exports hit the \$30 billion milestone

India's smartphone industry exported \$30 billion in 2025, Union Electronics and IT Minister Ashwini Vaishnaw said, while domestic production hit \$60 billion. PTI cited \$22 billion in exports for FY25, highlighting the difference between fiscal- and calendar-year data. Apple and Samsung drove 300 million units, with one-fourth exported, as electronics exports crossed \$44 billion.

India's \$4.5 billion electronics exports at risk amid Gulf tensions

Rising tensions around the Strait of Hormuz amid the Iran-Israel conflict threaten India's \$4.5 billion electronics exports to Gulf markets. The UAE, importing \$4.1 billion in FY26 (April-December), is a key re-export hub.

Freight rates and insurance costs are rising, air shipments face delays, and prolonged instability could disrupt supply chains and competitiveness.

Cadence welcomes Dr Alok Jain as India Managing Director

Cadence has appointed Dr Alok Jain as Managing Director for India to lead regional growth, scale operations, and deepen industry and government partnerships. A 35-year veteran, he will advance semiconductor

initiatives in India, which hosts over 30% of Cadence's global workforce and plays a central role in its R&D and talent development programmes, including C2S.

Tata Semiconductor chief KC Ang steps down

Chip veteran KC Ang has stepped down as President and head of Tata Semiconductor Manufacturing (TSM), less than a year after his April 2025 appointment. A former GlobalFoundries executive, Ang was instrumental in Tata's foundry push. His exit, citing personal reasons, comes as Tata advances its ₹910 billion Gujarat fab and ₹270 billion Assam plant, both slated for 2026 production.
