

It's the core of Stable Power Conversion

Nichicon DC link Film Capacitors

For Powering Stability Across Every Electrified System

For Powering Stability Across Every Electrified System

Nichicon DC link film capacitors deliver superior current handling, low ESR, and excellent high-frequency performance, ensuring high reliability and safety for xEV applications. We offer custom DC link, noise suppression, snubber, and filter film capacitors for motor drive inverters. Manufactured with high-reliability metallized polypropylene film produced in-house, ensuring consistent, high-quality performance.

High-Frequency Characteristics

Withstand Current Characteristics

Long Life

High Reliability, Safety Performance

Integrated Design

Shape Freedom

As the automotive industry shifts toward electrification and autonomy, Nichicon continues to innovate with capacitor solutions that support EV platforms, advanced driver assistance systems (ADAS), and next-generation vehicle electronics.
