

At-a-glance view of key industry trends that can shape the future of your business...

India's Smart TV Market Slips 3% As QLED Captures 30% Share

India's smart TV shipments declined 3% YoY in the first quarter of 2026, reflecting weaker consumer demand. However, premium display technologies gained traction, with QLED's market share doubling from 14% to 30%, while conventional LED TVs fell from 83% to 63%, highlighting a shift toward larger, higher-end televisions despite the market slowdown.

Global NAND Flash Market Reaches \$46 Billion In The First Quarter Of 2026

The global NAND flash memory market generated \$46 billion in Q1 2026, nearly doubling sequentially and growing 3.5 times YoY. AI-driven enterprise SSD demand remained the key growth driver, while Samsung retained market leadership with 29% share, followed by SK hynix with 18%. China's YMTC emerged as the fastest-growing player, recording 445% annual revenue growth.

Global AI Chip Revenue Set To Exceed \$1.2 Trillion By 2028

Revenue from semiconductors deployed in AI data centre servers worldwide is projected to surge from \$27 billion in 2022 to \$670 billion in 2026, with forecasts indicating anywhere between \$886 billion and \$1.2 trillion by 2028. The growth is being fueled by stronger demand for memory and networking chips and the rapid rise of AI inference workloads.

Global EDA Market To Double To US\$43 Billion By 2034

The global electronic design automation (EDA) market is projected to grow from US\$20.93 billion in 2026 to US\$43.07 billion by 2034, at a 9.4% CAGR. Rising semiconductor complexity, AI-driven chip design, automotive electronics, and advanced-node manufacturing are accelerating demand for EDA software worldwide.
