

India's defence production hits record ₹1.78 trillion

India's defence production reached a record ₹1.78 trillion in FY2025-26, up 15.6% YoY. Defence PSUs contributed 76% of output, while the private sector recorded a 24% share worth ₹420 billion. The growth also supported defence exports of ₹384.24 billion, pushing India's indigenous manufacturing and self-reliance goals.

Delhi bets ₹150 billion on an EV-first future

Delhi has approved its ₹150 billion EV Policy 2026 through March 2030, targeting 95% of new vehicle registrations to be electric by 2027. The policy offers category-specific incentives and mandates only

electric autorickshaw registrations from 2027. It also phases out new petrol and CNG two-wheelers from 2028, expanding charging and battery-swapping infrastructure.

PEOPLE (on the move)

Intel appoints Seok-Hee Lee as Vice President of its foundry

Intel has appointed semiconductor veteran Seok-Hee Lee as Executive Vice President of Intel Foundry, where he will lead advanced packaging, system integration, back-end technology development, and back-end manufacturing. Reporting to CEO Lip-Bu Tan, Lee joins from SK On and will help scale next-generation packaging technologies, including EMIB-T and HBI, for foundry customers.

Henkel welcomes Pradhyumna Ingle as India President

Henkel has appointed Pradhyumna Ingle as its new Country President for India, succeeding S. Sunil Kumar. Based in Navi Mumbai, Ingle will drive the company's growth strategy, strengthen market presence, and advance innovation while continuing his global leadership roles. The appointment comes as India experiences rising industrialisation and large-scale infrastructure investment.

Synopsys' Ramesh Narayanaswamy joins Si2

The Silicon Integration Initiative (Si2) has appointed Ramesh Narayanaswamy, an R&D Scientist at Synopsys, as Vice Chair of its Large Language Model Benchmarking Coalition (LBC). With more than 30 years of experience and 12 granted patents, he specialises in AI/ML and generative AI applications in EDA,

simulation acceleration, and domain-specific hardware accelerators.

AT&T names Jennifer Biry as next CFO

AT&T has appointed Jennifer Biry as its next Chief Financial Officer, effective January 1, 2027, succeeding Pascal Desroches, who will retire at the end of 2026. A 26-year company veteran, Biry will lead AT&T's finance function as the telecom giant continues investing in 5G and fibre network expansion.
