

Government waives customs duty on key electronics manufacturing inputs

The government has exempted basic customs duty on specified goods used to manufacture display assemblies, lithium-ion cells, and inductor coil modules. Effective from July 9, 2026, the move supports domestic electronics production under the PLI scheme, with display and inductor exemptions valid until March 2029, while benefiting EV, medical, industrial, and renewable energy sectors.

India plans ₹120 billion battery component incentive

The Indian government is preparing a ₹120 billion incentive scheme to boost domestic manufacturing of critical battery components, including cathode and anode materials, electrolyzers, and copper foil separators. It aims to reduce import dependence, strengthen the local battery supply chain, complement the ACC battery PLI scheme, and support growing EV and energy storage demand.

UP's Jewar gets ₹67.5 billion electronics manufacturing boost

Union minister Ashwini Vaishnaw and Uttar Pradesh chief minister Yogi Adityanath laid the foundation stone for two electronics manufacturing projects worth ₹67.5 billion at Yamuna City, Jewar, on 27th June. The ₹35 billion Amber Enterprises facility and ₹32.5 billion ASCENT-K Circuit advanced PCB plant are expected to create 3000 jobs, strengthening Jewar's electronics and semiconductor ecosystem.

BEL bags ₹10.81 billion in fresh defence orders

State-owned Bharat Electronics Limited (BEL) has secured ₹10.81 billion in new defence orders since May 25, 2026. The contracts cover communication systems, radars, CBRN protection, avionics, seekers, upgrades, spares, and services, reinforcing BEL's order book and supporting India's defence modernisation and indigenous manufacturing push.

Karnataka clears ₹75.06 billion industrial projects

Karnataka has approved 55 industrial

projects worth ₹75.06 billion, including major investments in electronics manufacturing by Kaynes Technology, SFO Technologies, and Terra Circuits. The projects, spanning aerospace and ESDM sectors, are expected to create over 28,000 jobs, with 41 located outside Bengaluru under the 'Beyond Bengaluru' initiative.

Indian Railways approves \$50 million electronic interlocking upgrade

Indian Railways has approved a \$50 million electronic interlocking project for Eastern Railway's Asansol Division, replacing 28 relay-based signalling systems across 27 stations with computer-based technology. The upgrade promises faster fault detection, improved reliability, easier maintenance, and higher line capacity, supporting safer, more efficient operations on one of India's busiest rail corridors.

INTERNATIONAL news

SpaceX to acquire AI startup Cursor for \$60 billion

SpaceX has agreed to acquire AI coding startup Cursor in an all-stock \$60 billion deal, one of the largest AI acquisitions to date. The transaction, expected to close in the third quarter of 2026, will strengthen xAI's artificial intelligence capabilities as SpaceX expands its AI infrastructure and enterprise technology ambitions following its stock market debut.

Onsemi set to buy Synaptics in \$7 billion AI deal

Onsemi will acquire Synaptics in an all-stock deal worth about \$7 billion, its largest acquisition to date. The transaction strengthens Onsemi's push into physical AI, connected computing, robotics, and automotive markets, while expanding its addressable market by \$30 billion to \$243 billion by 2030, according to Reuters.

BMW completes \$1.7 billion US EV investment

BMW has completed a US\$1.7 billion investment in its South Carolina, US operations, expanding its Spartanburg plant and opening a battery assembly facility in Woodruff. The company will begin producing the all-electric iX5 in late 2026 and plans to assemble at least six fully electric models in the US by 2030.

Samsung projects 19-fold profit jump amid AI spending concerns

On July 7, 2026, Samsung Electronics forecast a 19-fold increase in second-quarter operating profit to 89.4 trillion won, driven by robust demand for AI memory chips. However, its shares fell 6.9% the same day as investors raised concerns over the sustainability of AI infrastructure spending, erasing more than US\$80 billion from the company's market value.

Qualcomm to take over AI startup Modular for \$3.9 billion

Qualcomm has agreed to purchase AI startup Modular in an all-stock deal worth about \$3.9 billion to expand its AI and data centre capabilities. The acquisition will strengthen Qualcomm's software ecosystem for AI inference, reduce smartphone market dependence, and help it compete with Nvidia in the growing AI infrastructure market.

Tesla and NatPower partner on \$5 billion battery storage project

Tesla and NatPower have signed a multi-year agreement to build 25GWh of battery storage across five projects in Italy and Britain. Using Tesla's Megapack systems and energy trading technology, the first phase is valued at up to US\$5 billion, with the broader programme targeting over 100GWh of storage capacity.

Zetwerk receives SEBI approval for ₹42 billion IPO

EMS provider Zetwerk has secured Securities and Exchange Board of India (SEBI) approval for its proposed ₹42 billion IPO. The company manufactures printed circuit board assemblies (PCBAs), laptops, smartwatches, televisions, and EV chargers, and plans to use the proceeds to support business expansion.

Zypp Electric eyes \$200 million IPO for FY28

Zypp Electric is targeting an FY28 IPO of up to \$200 million within the next 18-24 months and has appointed Axis Capital, SBI Capital Markets, and DAM Capital as bankers. The Gurugram-based EV logistics startup is also raising \$40-50 million in a pre-IPO round to expand operations and prepare for its public market debut.
