

AXIS AUTOMATION

Website: www.axisautomation.in
Email: sales@axisautomation.in
Contact Number: 080-49529793
Address: #SY. No. 79/9, Superintendent Dinne, Hommadevanahalli, Gottigere Post, Bengaluru, Karnataka, India - 560083
Brand(s) Supplied: Myconic

BERGEN ASSOCIATES PVT LTD

Website: www.bergengroupindia.com
Email: info@bergengroupindia.com
Contact Number: 011-41425362
Address: 305-306, Magnum House-1, Commercial Complex, Karampura, Delhi - 110015
Brand(s) Supplied: Vitrox

BERGEN SYSTEMS

Website: www.bergen-systems.com
Email: sales@bergensys.com
Contact Number: 0124-4599124
Address: 409, Sector - 8, IMT Manesar, Gurugram, Haryana - 122050
Brand(s) Supplied: Pemtron

CHIPMAX DESIGNS PVT LTD

Website: www.neodenindia.com
Email: info@neodenindia.com
Contact Number: 9243777818
Address: #45, 1st Floor, 2nd Cross, Near Lakshmi Gold Paradise, Manorayana Palya, R.T. Nagar,

Global OEMs In India

ORGANISATION	WEBSITE
DELVITECHAI VISION SYSTEMS INDIA PVT LTD	delvi.tech
NORDSON INDIA PVT LTD	www.nordson.com
OMRON INDUSTRIAL AUTOMATION INDIA	www.automation.omron.com

Parmi Xceed
Supplied by: **DAIICHI JITSUGYO INDIA PVT LTD**

Bengaluru, Karnataka - 560032
Brand(s) Supplied: Neoden

DAIICHI JITSUGYO INDIA PVT LTD

Website: www.djkbharat.com
Email: sales@djkindia.co.in
Contact Number: 0124-4266080
Address: Unit No. 101, First Floor, Time Tower, Mehrauli-Gurgaon Road, Gurugram, Haryana, India - 122002
Brand(s) Supplied: Parmi, Omron, Mek, Maker Ray

DELVITECHAI VISION SYSTEMS INDIA PVT LTD

Website: delvi.tech
Email: sales@delvi.tech
Contact Number: 9945274751
Address: Sree Rama Deevana, #21, Ulsoor Road, Bengaluru - 560042, India
Brand(s) Supplied: Delvitech

Whats New In AOI Technology

INNOVATION	WHAT IT DOES	KEY BENEFITS
AI and Deep Learning-Based Defect Detection	Uses artificial intelligence to distinguish true defects from acceptable process variations by learning from inspection data	Reduces false calls, improves defect classification accuracy, minimises operator intervention, and increases first-pass yield
Advanced 3D AOI Technology	Employs structured light, laser, or Moiré projection to create precise 3D measurements of solder joints and components	Detects lifted leads, insufficient solder, coplanarity issues, and warped PCBs more accurately than traditional 2D AOI
Closed-Loop Process Control	Automatically feeds inspection results back to stencil printers, pick-and-place machines, and reflow ovens for real-time process adjustments	Reduces defects at the source, improves process stability, lowers rework, and enhances production yield
Integrated SPI, AOI, and AXI Inspection Platforms	Combines solder paste inspection (SPI), automated optical inspection (AOI), and automated X-ray inspection (AXI) into a unified quality management system	Accelerates root-cause analysis, improves traceability, and provides comprehensive inspection coverage throughout the SMT process
AI-Assisted Automatic Programming	Generates inspection programs automatically using CAD, Gerber, and BOM data while optimising inspection parameters through machine learning	Cuts programming time from hours to minutes, simplifies new product introduction (NPI), and reduces dependence on expert programmers
High-Speed Multi-Camera And Multi-Angle Imaging	Utilises multiple high-resolution cameras to inspect components simultaneously from different viewing angles	Delivers faster inspection speeds, higher throughput, and improved detection of hidden or complex defects
Inspection For Ultra-Miniature And Advanced Packages	Optimised for inspecting 0201, 01005 components, BGAs, QFNs, SiP, and advanced semiconductor packages	Supports high-density PCB assemblies required for EVs, AI hardware, medical devices, and advanced consumer electronics
Industry 4.0 And Smart Factory Connectivity	Integrates with MES, ERP, IPC-CFX, Hermes, and cloud-based manufacturing systems for real-time production monitoring	Enables end-to-end traceability, centralised quality management, remote diagnostics, and data-driven manufacturing decisions
Predictive Quality Analytics	Applies AI and statistical process control (SPC) to identify trends and predict process drift before defects occur	Prevents production issues, reduces downtime, improves equipment utilisation, and increases overall equipment effectiveness
Cloud-Based Inspection Data Management	Stores inspection data centrally, enabling secure access, remote monitoring, and enterprise-wide analytics across multiple production sites	Simplifies quality reporting, supports multi-factory benchmarking, enables remote technical support, and improves compliance with quality standards
