

Physical AI Models for Engineering & Innovation

Future-Proof your Engineering R&D, Deep-tech Product development and Skill Development with our Physical AI Labs

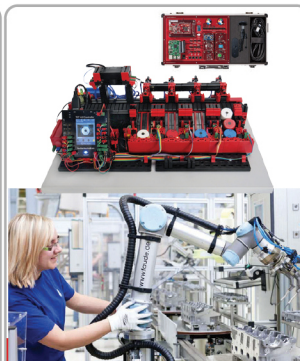

For over three decades, Edutech offers various emerging technology & hardware models to global enterprises for innovation centers, product development, research & training, POC, validation & customer demonstrations

Industry 4.0, IoT,
Digital Engineering

Embodied AI for
Enterprise Use Cases

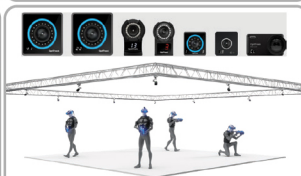

Physical AI Hardware
Models/Prototype for
your Business

Future Mobility Labs (EV,
Autonomous Vehicles,
SDV & Drones)

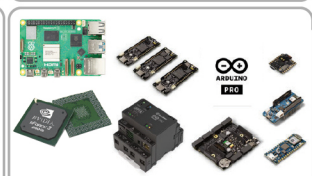

Software Defined
Healthcare /
MedTech Labs

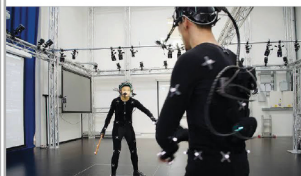

Motion Capture for
Movement Sciences

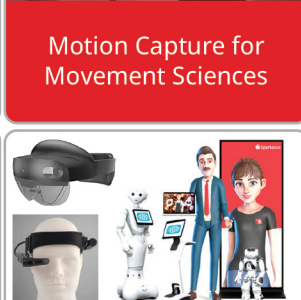

Smart
Energy Labs

Industry Std. Chipsets, IoT,
Cloud & Edge AI HWs with
Sensors and Actuators

Private 5G & Enterprise
Communication Labs

AI Based Displays:
Holographic, Spatial AI,
Avatars, Interactive Robots
& Kiosks, Face Computing,
Capability demos.

Industry Aligned
Cybersecurity Labs

Build your own Systems:
Sensors, DIY Components,
Accessories, Innovation
Lab Projects, POC, etc
