## India's EMS Sector Eyes US\$150 Billion Milestone By Fiscal 2030

India's EMS market is set to leap from US\$45 billion in FY25 to over US\$150 billion by FY30, with a sharp rise in domestic electronics manufacturing from US\$140 billion to US\$390 billion. The outlook follows a record US\$130 billion electronics production in FY25, with exports touching US\$44 billion. Mobile phones accounted for 44% of output, while semiconductor exports soared by 101%, highlighting India's growing manufacturing prowess.

### Overview Of The Indian Electronics Sector During 2021 To 2025 (US\$ Billion)

### The Production Share Of The Key Sub-Segments In The Indian Electronics Industry

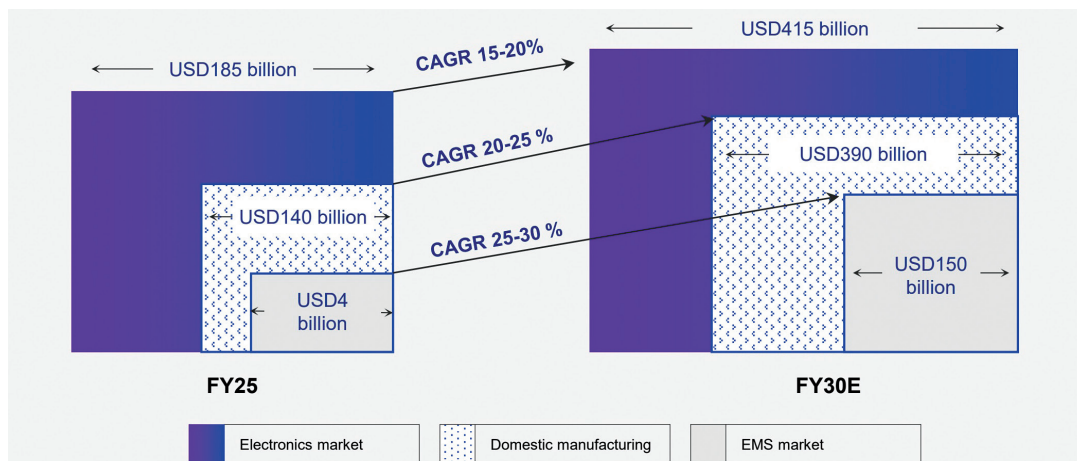

### India's Electronics Export Performance By Product Category

| Product Category     | Exports (2024) | CAGR (21-24) | % Global share 2021 | % Global share 2024 | Exports (2024) | CAGR (21-24) | % Global share 2021 | % Global share 2024 |
|----------------------|----------------|--------------|---------------------|---------------------|----------------|--------------|---------------------|---------------------|
| Mobile phones        | 215            | (6%)         | 40                  | 37                  | 22             | 51%          | 1                   | 3.8                 |
| Power converters     | 46             | 5%           | 31                  | 29                  | 3              | 12%          | 1.7                 | 1.9                 |
| Electric cables      | 31             | 2%           | 19                  | 18                  | 2              | 20%          | 0.8                 | 1.3                 |
| Semiconductors       | 48             | (0.4%)       | 33                  | 33                  | 1.8            | 101%         | 0.1                 | 1.2                 |
| Electric motor parts | 8              | (1%)         | 32                  | 30                  | 1.3            | 17%          | 3.3                 | 5.1                 |
