Smartphone SoC Shipments Fall 8% YoY In The First Quarter Of 2026

Global smartphone SoC shipments fell 8% YoY in Q1 2026 due to memory shortages that disrupted supply chains. Memory prices surged 50-55% QoQ, pressuring costs and delaying launches. Qualcomm and MediaTek saw double-digit shipment declines, holding 24% and 33% market share respectively, while Apple, Samsung, Google, and UNISOC grew. Double-digit shipment declines are expected in Q2 and throughout 2026, with shortages continuing until H2 2027 and supply recovery likely by early 2028.
