

India's electronics manufacturing output may reach \$250 billion in five years

India's electronics manufacturing sector is projected to reach \$250 billion within five years, with its workforce expected to double from 2.5 million by 2031, according to *Invest India*. Driven by 5G, IoT, and government initiatives, domestic production grew from \$49 billion in FY17 to \$101 billion in FY23, while mobile phone manufacturing and exports also recorded strong growth.

India eyes record \$2 billion domestic military drone procurement

India is preparing to place military drone orders worth over \$2 billion, potentially its largest-ever unmanned systems procurement. Fast-track deliveries within 18-24 months aim to strengthen surveillance, reconnaissance,

and strike capabilities. The move, driven by evolving security needs, recent conflicts, and military modernisation plans, is expected to boost India's growing domestic drone industry.

Mahesh Viswanathan becomes the CEO of Finolex Cables

Finolex Cables has appointed Mahesh Viswanathan as CEO, marking a leadership transition to support growth and diversification. A chartered accountant with over 40 years of industry experience and 17 years at Finolex, he will focus on strengthening core operations, expanding into consumer electrical and smart-home segments, and driving long-term business growth.

Texas Instruments appoints Julie Knecht as the next CFO

Texas Instruments has appointed Julie Knecht as Chief Financial Officer, effective August 1, succeeding Rafael Lizardi, who is retiring after 25 years with the company. A TI veteran since 1999, Knecht currently serves as Chief Accounting Officer. The leadership transition comes as demand for analogue semiconductors grows, driven by AI infrastructure and data-centre expansion.
