

Key Selection Criteria To Look For While Evaluating

S.No.	SELECTION CRITERIA	WHAT TO EVALUATE	TYPICAL REQUIREMENT FOR MODERN ELECTRONICS MANUFACTURING	IMPORTANCE
1	Print Accuracy	PCB-to-stencil alignment accuracy	± 12.5 to $\pm 25\mu\text{m}$	Critical
2	Print Repeatability	Consistency of successive prints	± 12.5 to $\pm 20\mu\text{m}$	Critical
3	Fine-Pitch Capability	Ability to print for 0201, 01005, μBGA , CSP packages	Support for 01005 and fine-pitch BGAs	Critical
4	Throughput (UPH)	Boards printed per hour	Match or exceed placement machine capacity	High
5	Vision Alignment System	Fiducial recognition, camera resolution, auto offset correction	Fully automatic vision alignment	Critical
6	PCB Size Range	Minimum and maximum PCB dimensions supported	Suitable for current and future product range	High
7	PCB Thickness Capability	Range of PCB thicknesses handled	Typically 0.4mm to 6mm or higher	Medium
8	Squeegee System	Pressure, speed, angle, programmable settings	Closed-loop pressure control preferred	High
9	Stencil Cleaning System	Dry, wet and vacuum cleaning capability	Automatic dry/wet/vacuum cleaning	High
10	Paste Management	Paste monitoring, replenishment, and consistency control	Automatic paste management preferred	Medium
11	Process Control Features	Automatic print offset correction, pressure compensation	Closed-loop process control	High
12	SPI Integration	Compatibility with 2D/3D solder paste inspection systems	Closed-loop SPI feedback capability	High
13	Changeover Time	Time required for stencil and product changeovers	Less than 5 minutes preferred	Medium
14	Multi-Product Flexibility	Ability to handle frequent product changes	High-mix production support	Medium
15	Industry 4.0 Readiness	MES connectivity, OPC-UA, data collection, traceability	Smart factory integration	High
16	Traceability Features	Barcode, QR code, and production data tracking	End-to-end traceability	High
17	Reliability And Uptime	Machine availability and MTBF	>98% uptime preferred	Critical
18	Preventive Maintenance	Ease and frequency of maintenance	Tool-less, operator-friendly maintenance	Medium
19	Local Service Support	Availability of trained service engineers	Local support team in India	Critical
20	Spare Parts Availability	Local inventory and lead times	Critical spare stock available in India	High
21	Training And Process Support	Operator training and application engineering support	On-site and refresher training available	Medium
22	Software And User Interface	Ease of programming and operation	Intuitive touchscreen interface	Medium
23	Future Technology Compatibility	Capability to support future component miniaturisation	Ready for next-generation SMT requirements	High
24	Total Cost Of Ownership (TCO)	Machine cost, maintenance, consumables, and spares	Lowest lifecycle cost, not just lowest purchase price	Critical
25	Return On Investment (RoI)	Yield improvement, labour savings, and throughput gains	Payback period aligned with production goals	High

HANWHA SEMITECH CO., LTD

Website: www.hanwha-pm.com
 Contact: 9810001345
 Email-ID: tandon@hanwha.com
 Address: 505, 5th Floor, Caddie Commercial Tower, Aerocity, New Delhi, India
Fully Automatic Inline Brand(s): Hanwha

HEXAA BYTES SYSTEMS

Website: www.hbschennai.com
 Contact: 9444010898
 Email-ID: hbschennai@gmail.com
 Address: Plot No. 145, 146 Rajiv Nagar, 3rd Main Road, Vanagaram, Chennai, Tamil Nadu, India - 600077

IMTRONICS TECHNOLOGY

Website: www.imtronics.in

Contact: 9971302649
 Email-ID: sales@imtronics.in
 Address: G-312, Ground Floor, Sector-63, Noida - 201301
Semi Automatic Stencil Printer Brand(s): Zhengbang
Fully Automatic Inline Brand(s): Zhengbang

ITW EAE

Website: www.itweae.com
 Contact: 9867177129
 Email-ID: ssawant@itweae.com
Fully Automatic Inline Brand(s): MPM

JUKI INDIA PVT LTD

Website: www.smtjukiindia.com
 Contact: 9323619519
 Email-ID: vg.smt@ml.juki.com

NeoDen ND-1
