

Official Distributor for India

VENUS POWER ELECTRONICS

WAYON

SEMICONDUCTORS CHINA

BUILT FOR AUTOMOTIVE GRADE DEMANDS

PROTECT WHAT DRIVES INDIA FORWARD.

Automotive electronics demand zero-compromise protection. Wayon's AEC-Q101 qualified TVS Diodes deliver the precise transient voltage suppression your vehicle systems need – from engine control units to ADAS and EV powertrains. Now available across India through Venus Power Electronics.

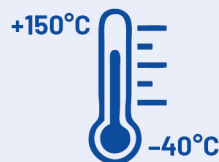

TVS DIODES

Unidirectional & bidirectional. Ultra-fast response time, clamping voltages from 5V to 200V. Protects sensitive automotive ICs from load dump, ESD, and surge events.

AEC-Q101 QUALIFIED

Every part meets Automotive Electronics Council standards – stress tested for the temperature extremes, vibration, and humidity that automotive environments demand.

WIDE TEMP RANGE

Rated for -40°C to $+150^{\circ}\text{C}$. Designed to perform consistently across under-hood, body, and chassis locations throughout the vehicle's lifetime.
