

India fast-tracks FDI approvals in 40 sectors, including electronics

India has fast-tracked FDI approvals to 60 days for investments from neighbouring countries across 40 manufacturing sub-sectors, including electronics components, display panels, camera modules, batteries, polysilicon wafers, and rare-earth magnets. Despite faster clearances, India retains control over resident ownership and mandates stricter disclosures of shareholding, beneficial ownership, management, and foreign links.

MoD finalises ₹14.76 billion defence deal with BEL

The Ministry of Defence signed a ₹14.76 billion contract with Bharat Electronics Limited (BEL) to supply five ground-based mobile electronic systems for the Indian Army. The project carries 72% indigenous content

under the Buy (Indian-IDDMM) category, aiming to modernise army units while strengthening domestic defence manufacturing and advancing Aatmanirbhar Bharat and Make-in-India goals.

PEOPLE (on the move)

HCLTech appoints Kimsuka Narsimhan as Independent Director

HCLTech appointed Unilever and PepsiCo veteran Kimsuka Narsimhan as an Independent Director on April 20, 2026. Bringing 35 years of global finance and governance expertise, her arrival supports HCLTech's AI-driven growth and strategic expansion. Crucially, this appointment advances the company's board diversity, with women now making over 54 per cent of the board.

Tejas Networks appoints new CEO, CFO team

Tejas Networks promoted co-founder Arnob Roy (left) as MD & CEO and named Tata veteran AVS Prasad (right) CFO as it seeks a turnaround after FY26 losses. Roy brings 30+ years in telecom and semiconductor R&D, while Prasad adds

deep finance expertise. The leadership reset comes amid revenue decline, rising warranty costs, and operational pressures.

Nvidia set to welcome Suzanne Nora Johnson to its board

Nvidia has appointed Suzanne Nora Johnson to its board effective July 13, 2026. Johnson, with leadership experience across finance, technology, and healthcare, will also join the Audit Committee. The move expands Nvidia's board to 11 members as it accelerates AI-driven growth and governance efforts.

Apple picks John Ternus as next CEO to lead its AI reinvention

Apple appointed longtime hardware chief John Ternus as CEO from September 1, 2026, succeeding Tim Cook, who will become Executive Chairman. Ternus, an Apple veteran since 2001 and architect behind the development of Mac, iPad, and AirPods, now faces the challenge of accelerating AI integration as Apple trails AI-driven rivals like Nvidia in market leadership and the global AI race.
