

India's electronics exports cross ₹4 trillion in 2025

India's electronics exports surpassed ₹4 trillion in 2025, driven by a surge in smartphone shipments. According to IT Minister Ashwini Vaishnaw, the sector is set to grow further, with four semiconductor fabs expected to start commercial production in 2026. Mobile phone production is expected to reach ₹6.76 trillion, with iPhone exports reaching ₹2.03 trillion, creating millions of jobs and boosting foreign exchange earnings.

Paras Defence bets ₹5 billion on semiconductors

Paras Defence is investing ₹5 billion to establish a semiconductor production facility in India, focusing on advanced packaging and assembly technologies, such as chiplet integration and 3D packaging. Set to begin operations by 2027, it will cater to defence, security, and high-performance computing sectors, filling a key gap in India's semiconductor value chain and boosting self-reliance.

Dixon and Kaynes stocks plunged 50% as the EMS rally unwound in January 2026

On January 18, 2026, India's EMS stocks saw a sharp 50% decline, led by Dixon Technologies and Kaynes Technology, as valuations adjusted. Despite the correction, smaller companies like Syrma SGS Technology and Avalon Technologies remained resilient. They focus on high-margin, long-cycle sectors like industrial, defence, and automotive. Meanwhile, Avalon's revenue surged 48.7% to ₹7.06 billion in the first half of FY26.

India-EU FTA opens \$750 billion electronics market

The India-EU free trade deal promises Indian electronics firms preferential access to the \$750 billion EU market and cheaper high-end machinery for semiconductor production. The agreement, which includes mutual recognition of standards, will eliminate tariffs on key products such as LED TVs and lighting, thereby boosting exports. It could increase India-EU trade from \$20 billion to \$50 billion by 2031, experts say.

Updates From EFY Group

Event, Date and Venue	Topics	Contact for details
AI Developers' Conference India March 12-13, 2026 NIMHANS Convention Centre, Bengaluru	It brings together global developers, tech leaders, and researchers to explore cutting-edge AI tools, frameworks, and platforms, spanning cloud, edge, open source, and next-generation innovations shaping tomorrow's technology landscape.	Website: https://www.aidevcon.in
India Electronics Week May 13-15, 2026 KTPO Expo Center, Whitefield, Bengaluru	India's No. 1 event for creators of smart electronics solutions to discover latest techniques, best practices and technologies for developing electronics better, cheaper and faster, and meet service providers, suppliers and partners who can enable growth of your business.	Website: www.indiaelectronicsweek.com
embedded India May 13-15, 2026 KTPO Expo Center, Whitefield, Bengaluru	It's India's only tech conference-plus-expo focused on Embedded Systems. It caters to developers of embedded systems solutions by empowering them with the latest tech and best practices to develop innovative solutions using cutting-edge tech and out-of-the-box planning.	Website: https://www.embedded-india.com
IoTShow.in May 13-15, 2026 KTPO Expo Center, Whitefield, Bengaluru	The conferences at IOTSHOW deliver an unsurpassed depth and breadth in practical content. Participate in cutting-edge talks and training by industry stalwarts and thought leaders who are transforming the IoT scene themselves. Build the skills you need to get ahead with your career and the ones you need to stay ahead.	Website: https://www.iotshow.in

India-US trade deal lifts electronics export sentiment outlook

The India-US trade agreement capped US tariffs on Indian goods at around 18%, reducing the risk of sudden punitive duties on exports. While details on product-specific tariffs remain pending, the pact provides policy certainty and could benefit companies such as Tata Electronics and Foxconn. It supports long-term planning and aligns with India's push for electronics localisation.

L'Oréal commits ₹35 billion to Hyderabad AI hub

International beauty brand L'Oréal is investing ₹35 billion to establish India's first beauty-tech hub in Hyderabad, which is likely to create 2000 specialised jobs by 2030. The facility will focus on AI, data platforms, and digital engineering to support global operations. The project strengthens India-France innovation ties and aligns with Telangana's tech ambitions.

Qualcomm tapes out 2nm chip from India

Qualcomm has completed the tape-out of a 2-nanometre chip design, with major contributions from its India centres in Bengaluru, Chennai, and Hyderabad. India is now Qualcomm's largest chip design base outside the US. The milestone resonates with India's growing role

in next-generation semiconductor design, the industry says.

Sensesemi secures ₹250 million funding for edge-AI chip development

Bengaluru's Sensesemi Technologies raised ₹250 million in seed funding led by Piper Serica to accelerate development of its edge-AI chips for industrial and medical markets. The company is developing integrated chips that combine AI, connectivity, and sensing to reduce complexity and power consumption. Funds will support chip tape-outs, reference designs, and team expansion to accelerate adoption.

Texas Instruments opens R&D hub in Bengaluru

Texas Instruments opened a 51,100-square-metre (550,000-square-foot) R&D centre in Bengaluru, celebrating 40 years in India. The facility will focus on analogue and embedded processing technologies, with advanced labs for IC design and reliability testing. It was inaugurated by Electronics and IT Minister Ashwini Vaishnaw.

Startups achieve 12nm chip tape-outs under DLI, government reviews

On January 27, 2026, Minister Ashwini Vaishnaw reviewed the progress of India's Design Linked Incentive
