

Excerpt from JAPAN UNIX Manga Collection Vol. 1

Discover Japan Unix's Soldering Technology Through Manga — With Steve.

Guided by Steve, our virtual soldering engineer, explore the journey of Japan Unix — from its founding history to today's automation solutions. The series introduces key products, manufacturing technologies, and soldering know-how that support stable mass-production quality, all presented in an engaging and easy-to-understand story format.

Growing Demand for Automation and High-Reliability Soldering in India

Japan Unix exhibited at Productronica India 2026, held from April 8 to 10 in Greater Noida.

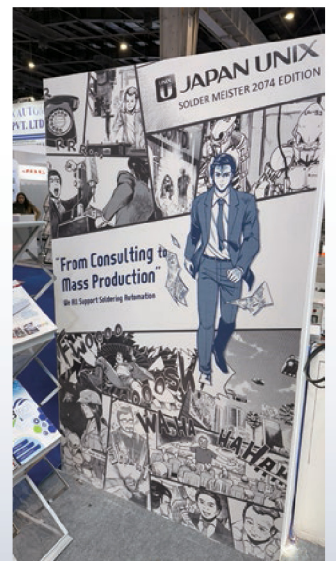

The company showcased Desktop Soldering Robots "Lite Kit" and "UNIX-DF404S," along with the soldering controller "USC-06."

There is a growing demand for automation, along with increased interest in high-reliability applications (such as automotive and electrification), process visibility, and traceability.

In response to these needs, Japan Unix products—with their stable soldering quality, reduced variation, and high reproducibility—were well received for demanding manufacturing environments.
