

Power That Keeps Running Even in Limited Spaces. Because It's Built to Last.

Nichicon Lithium Titanate Batteries(LTO)

Delivering ultra-long cycle life, fast charging,
and stable performance for space-constrained IoT applications.

Long life

Maintain a capacity
of at least **80%**
after **25,000**
charging/discharging
cycles

Rapid charge/ discharge

High input/output
density approaching
electric double
layer capacitors
(EDLCs)

Low charging current

Capable of charging
at low rate
using energy
harvesting

Low temperatures

Possible to use in
cold regions
(-30deg.C)

Safety

Extremely low
possibility of
explosion or ignition
even when
used under harsh
conditions

What is a Lithium Titanate Battery (LTO)?

The lithium titanate battery (LTO) shares many characteristics with the lithium-ion battery. One difference is the LTO anode. An LTO battery uses lithium titanate oxide, while a lithium-ion battery uses carbon. By using lithium titanate, the battery has a significant performance improvement.
