

THE DASHBOARD

India's Semiconductor Market To Reach \$17.42B by 2031

India's semiconductor market is projected to grow from \$12.41 billion in 2026 to \$17.42 billion by 2031 at a 7.02% CAGR. Government incentives, transport electrification, 5G and BharatNet expansion, and rising data-centre and AI demand are driving growth. Communication accounted for 32.87% of 2025 revenue, while automotive is expected to be the fastest-growing end-user segment at 8.66% CAGR.

India's Battery Swapping Market Set For Strong Growth

India's battery swapping market is projected to grow from \$48.13 million in 2025 to \$517.92 million by 2034 at a 30.21% CAGR. With over 4000 swapping stations by mid-2025, demand is driven by commercial fleets, e-rickshaws, and last-mile delivery. BaaS adoption is also rising, supported by government policies, battery-less EV registration, and expanding swapping infrastructure.

India's Smartphone Shipments Fall 13% In Q2 2026

India's smartphone shipments fell 13% YoY to 33.9 million units in Q2 2026, as rising memory costs and handset prices weakened mass-market demand, according to Omdia. Delayed upgrades, rupee depreciation, and inflation also weighed on sales. Vivo led with 6.3 million shipments, followed by Samsung at 5.9 million, OPPO at 4.6 million, Xiaomi at 4.5 million, and Apple at 3.5 million.
