BANGALORE UNPACKED THE ELECTRONICS POWERING AI DATA CENTRES

On 18 June 2026, Mouser Electronics brought its roadshow to Taj MG Road, Bengaluru, focusing on technologies supporting the rapidly evolving data centre landscape. The programme examined high-voltage DC protection, intelligent connectivity, cooling, and connectivity solutions for AI infrastructure. Sessions from Littelfuse, Phoenix Contact, ADI, and TE Connectivity explored how advances in power, connectivity, and cooling are helping engineers address the demands of reliable and efficient AI data centres.

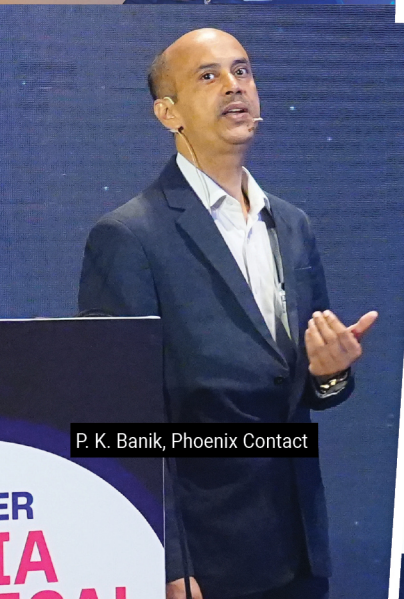

SESSION TITLE	SPEAKER
Keynote Address	Jailendra Kumar
Selecting the Right Protection for High Voltage DC-Based Data Centres	Navneet Vinaik
Intelligent Connectivity – Accelerating the AI Hardware Revolution	P. K. Banik
Coolant Distribution Manifold for Data Centres	Anju Puthan Purayil
TE IAE Products for Data Centre Applications Enabling AI	Gavin Pereira
Open House Q&A & Vote of Thanks	—

Sahadev Devangi Harsha, TE Connectivity

N. Srinivas Kumar, Phoenix Contact

P. K. Banik, Phoenix Contact

Navneet Vinaik, Littelfuse

Jailendra Kumar, HighNorm Systems and Services

Clinton Jose, Mouser Electronics
