

Government approves 31 more ECMS projects with total reaching 106

The government has approved 31 additional ECMS (Electronics Components Manufacturing Scheme) projects involving ₹78.77 billion investment, taking total approvals to 106. The projects are expected to generate ₹822.43 billion in production and 9588 direct jobs. Covering components, raw materials, and capital equipment, the scheme now represents ₹695.48 billion investment and ₹5.34 trillion in projected production, strengthening domestic electronics manufacturing.

Government approves ₹625 billion Mobile Phone Manufacturing Scheme

The Centre has approved the ₹625 billion Mobile Phone Manufacturing Scheme for FY2026-27 through FY2030-31, offering 2.25%-5% sales incentives, with additional support for domestic components and R&D.

The scheme targets ₹39 trillion in mobile production and 60,000 direct jobs, while strengthening domestic value addition, exports, supply chains, and India's global electronics manufacturing position.

Hyundai expands EV charging network to 30,000+ points

Hyundai Motor India has expanded access to more than 30,000 EV charging points through its myHyundai app, covering multiple charge-point operators. The company operates 183 DC fast-charging stations across

105 cities and plans to reach 600 by 2030. Its chargers offer 60kW-240kW capacity, supporting wider EV adoption as Hyundai prepares to launch a mass-market electric SUV.

PEOPLE (on the move)
