

Mapping the World

ABOUT THE ATLAS
This atlas is divided into six continental sections—North America, South America, Africa, Europe, Asia, and Australasia and Oceania. Each country, or group of countries, then has its own map that shows cities, towns, and main geographical features such as rivers, lakes, and mountain ranges. Photographs and text provide detailed information about life in that country—its people, traditions, politics, and economy. Each continental section has a different color border to help you locate that section. There is also a gazetteer and an index to help you access information.

FOREIGN NAMES
Features on the maps are generally labeled in the language of that country. For example, it would be:
Lake on English-speaking countries
Lago on Spanish-speaking countries
Lac on French-speaking countries
However, if a feature is well-known or mentioned in the main text on the page, it will appear there in English so that readers can find it easily.

MAP LOCATOR
This map shows, in red, the location of each country, part of a country, or group of countries in relation to the whole planet. There is a locator for each map in the book.

MAP COLORS
The colors shown on the maps are built up from numerous satellite photographs and reflect the true colors of the land, averaged over the seasons. Certain colors give clues to what the land is like—whether it is forested or farmland, mountains or desert.

- Land appearing sandy tends to be desert, semi-desert, or scrub.
- Mountainous desert looks like this, with shadows on the sandy background color.
- Pale green is usually grassland or crop land.
- Darker greens usually indicate wooded land or pasture.
- White shows land under permanent cover by snow and ice.

USING THE GRID REFERENCES
The letters and numbers around the outside of the page form a grid to help you find places on the map. For example, to find Kabul, look up its name in the gazetteer (see pp.112–133), and you'll find the reference 85 J7. The first number is the page, the letter and number refer to the square made by following up or down from J and across from 7 to form J7.

SCALE
Each map features a scale that shows how distances on the map relate to miles and kilometers. The scale guide can be used to see how big a country is. Not all maps in the book are drawn to the same scale.

KEY TO MAP SYMBOLS

- BORDERS**
- International border: Border between countries, which is mutually recognized.
 - State border: Border used in some large countries to show internal divisions.
 - Disputed border: Border used in practice, but not mutually agreed between two countries.
 - Claimed border: Border that is not mutually recognized—where territory belonging to one country is claimed by another.
 - Ceasefire line
 - Undefined boundary

- PHYSICAL FEATURES**
- Mountain
 - Depression
 - Volcano
 - Pass/Tunnel
- DRAINAGE FEATURES**
- Major river
 - Minor river
 - Seasonal river
 - Dam
 - Canal
 - Waterfall
 - Seasonal lake
- MISCELLANEOUS FEATURES**
- Site of interest
 - Ancient wall

- COMMUNICATIONS**
- Highway
 - Major road
 - Minor road
 - Rail
 - Airport
- TOWNS & CITIES**
- More than 500,000
 - 100,000 – 500,000
 - 50,000 – 100,000
 - Less than 50,000
 - National capital
 - Internal administrative capital
 - Polar research station

- LATITUDE & LONGITUDE**
- Equator
 - Tropics/Circles
- NAMES**
- REGIONS**
- FRANCE** Country
- JERSEY (British Crown Dependency)** Dependent territory
- KANSAS** Administrative region
- Dordogne** Cultural region
- TOWNS & CITIES**
- PARIS** National capital
- SAN JUAN** Dependent territory capital city
- Seattle** Other towns & cities
- Limón**
- Genk**
- San José**

- NAMES continued**
- PHYSICAL**
- Andes** Landscape features
- Ardennes**
- Balearic Islands** Island group
- Majorca** Island
- Lake Baikal** Lake/River/Canal
- PACIFIC OCEAN**
- Gulf of Mexico** Sea features
- Bay of Campeche**
- Chile Rise** Undersea feature
- OTHER FEATURES**
- Tropic of Cancer** Graticule text
