

# LIFE WITHOUT INDUSTRY IS GUILT

STEPHENSON'S *ROCKET* ENTERS SERVICE (1830)

## IN CONTEXT

### FOCUS

#### The Industrial Revolution

### BEFORE

**1776** Adam Smith's *The Wealth of Nations* is published.

**1781** Watt's first rotating steam engine is invented; the world's first iron bridge is built at Coalbrookdale, England.

**1805** The Grand Junction Canal, between Birmingham and London, is completed.

**1825** The world's first commercial steam-powered railroad, linking Stockton and Darlington, opens.

### AFTER

**1855** The Bessemer furnace is introduced.

**1869** The first transcontinental railroad is completed in the US.

**1885** The first practical gasoline-driven internal-combustion engine is installed in a motor vehicle, in Germany.

**O**n September 15, 1830, the world's first commercial passenger rail service to be powered by a steam engine—George Stephenson's *Rocket*—was opened. This was the Liverpool and Manchester Railway, which was 35 miles

A **scientific revolution** in the West creates a sense that the world can be **better understood** and better exploited.

The development of steam-powered machinery encourages the growth of **factory-based mass production**.

**Stephenson's Rocket heralds a new form of faster, more reliable transportation.**

The West imposes itself across the rest of the globe, creating **interlocked global markets**.

Industrial societies' **dependence on fossil fuels** leads to a strain on the **natural environment**.

(56 km) long and served by locomotives, also designed by Stephenson, that were capable of reaching speeds approaching 30 mph (48 km/h).

Stephenson's *Rocket* symbolized what remains the key development in world
