

Tiny

bubbles

You can make **great bubbles** by trapping **air** inside **soapy water**. These bubbles are small and super soft.

You will need:

warm water

soap

food colouring

These bubbles are so tiny that you have to look closely to see them. Together they make a thick foam.

1

Very carefully, **grate the soap** into little bits. Be careful of your fingers!

**Adult
ALERT!**

cheese grater

2

Add the grated soap to warm water and mix it around until it **dissolves**.
