1 m
3¼ ft

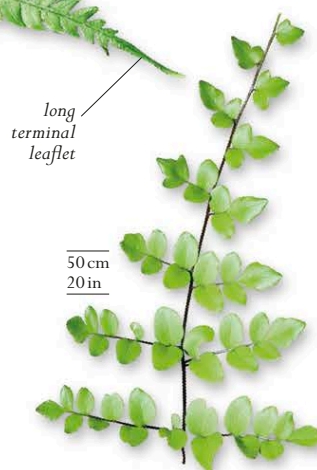

SILVER BRAKE
Pteris argyraea
F: Pteridaceae

This shade-loving fern is named for its distinctive fronds, which have a silvery white central stripe. Originally from S.E. Asia, it is widely grown as a houseplant.

PAINTED BRAKE
Pteris tricolor
F: Pteridaceae

From Malaysia, painted brake has an unusual range of colours: its metallic-looking, copper-coloured young fronds turn green as they mature.

20 in

CLIFF BRAKE
Pellaea viridis
F: Pteridaceae

Native to South Africa, this drought-resistant fern has shining green fronds with wiry, black stems. It grows in open woodland on mountains.

10 in

SILVER LIP FERN
Cheilanthes argentea
F: Pteridaceae

From E. Asia, this small, evergreen fern has wedge-shaped fronds with black veins and distinctive silvery markings on their underside.

16 in

NORTHERN BEECH FERN
Phegopteris connectilis
F: Thelypteridaceae

Found as far north as Greenland, this compact fern grows in a variety of habitats from woodland to rocky tundra.

75 cm
30 in

MOUNTAIN FERN
Oreopteris limbosperma
F: Thelypteridaceae

Found in damp habitats on acid soil, this clump-forming European fern gives off a characteristic lemony smell if its fronds are bruised.

2 m
6½ ft

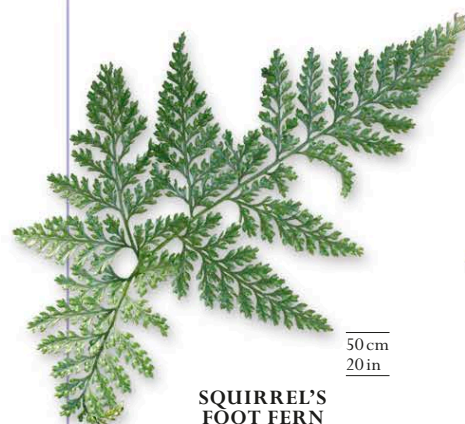

BRACKEN
Pteridium aquilinum
F: Dennstaedtiaceae

Found on every continent except Antarctica, bracken spreads vigorously by growing underground rhizomes. It often dies back in winter, sprouting new fronds in spring.

1 m
3¼ ft

LADDER BRAKE
Pteris vittata
F: Pteridaceae

Widespread in warm regions, this fern has upright or arching fronds with narrow, linear leaflets. It usually grows on limestone and in alkaline soils.

50 cm
20 in

SQUIRREL'S FOOT FERN
Davallia trichomanoides
F: Davalliaceae

This epiphytic fern from Malaysia creeps over trees and other plants. Its rhizomes have fur-like scales and tips that resemble a squirrel's foot.

1.8 m
6 ft

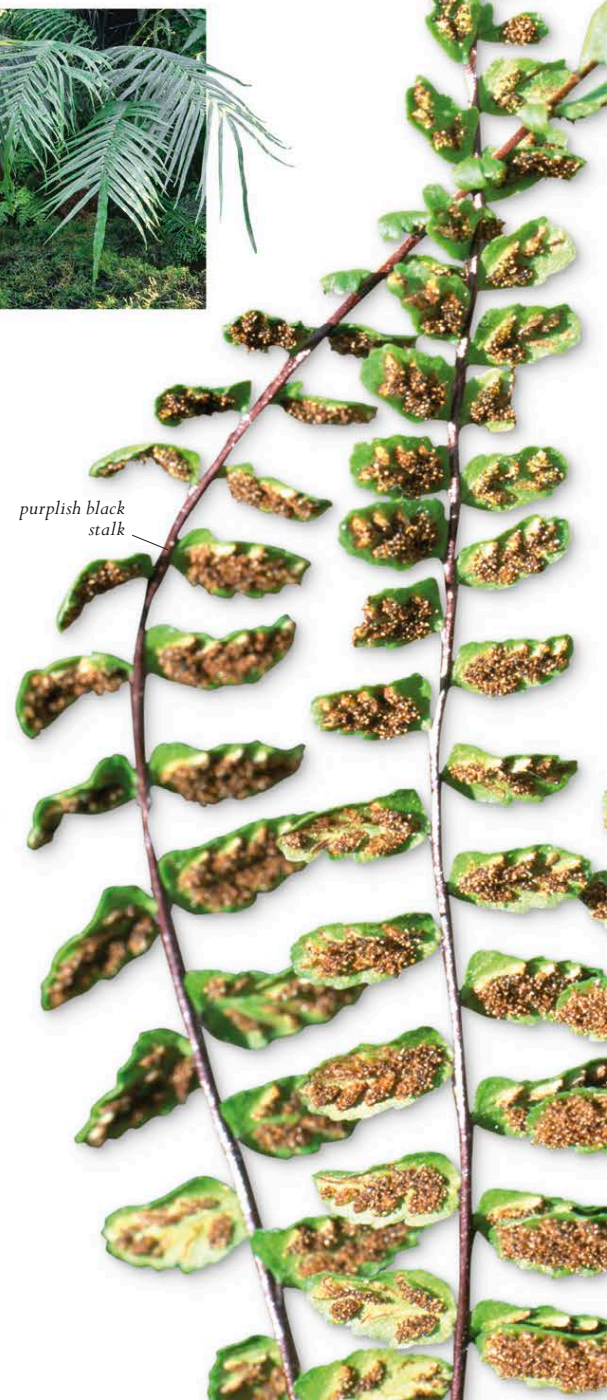

EUROPEAN CHAIN FERN
Woodwardia radicans
F: Blechnaceae

Native to S.W. Europe and Algeria, this is a luxuriant fern of damp, shaded habitats. Its arching fronds sometimes produce bulbils (small bulbs) at their tips.

75 cm
30 in

HARD FERN
Blechnum spicant
F: Blechnaceae

This evergreen fern has spreading sterile fronds, and upright fertile fronds with leaflets like narrow ribs. It is native to the temperate northern hemisphere.
