3 1/4 ft

WATER LETTUCE

Pistia stratiotes
F: Araceae

Of uncertain origin, this lettuce-sized member of the aroid family floats in warm fresh waters worldwide, often clogging waterways.

SWISS CHEESE PLANT

Monstera deliciosa
F: Araceae

The mature leaves of this tree-climbing aroid from C. America become perforated and divided. Swiss cheese plant is widely grown as a houseplant.

20 m/65 ft

TARO

Colocasia esculenta
F: Araceae

This large-leaved aroid, native to tropical Asia and the Pacific, has been cultivated extensively since ancient times for its edible tubers.
