

» POALES

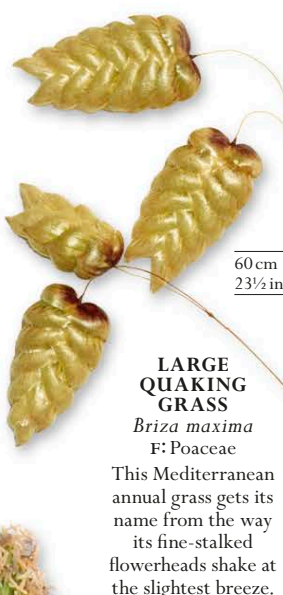

SOFT RUSH
Juncus effusus
F: Juncaceae

This very widespread rush thrives in damp infertile soils. Its cylindrical stems are filled with spongy tissue, or pith.

LARGE QUAKING GRASS
Briza maxima
F: Poaceae

This Mediterranean annual grass gets its name from the way its fine-stalked flowerheads shake at the slightest breeze.

23 1/2 in

FALSE OAT-GRASS
Arrhenatherum elatius
F: Poaceae

Common across its native Europe, this tall-flowered wild relative of the oat has now spread to many other parts of the world.

1.8 m
6 ft

SAND COUCH
Thinopyrum junceiforme
F: Poaceae

This tough grass grows on the seaward side of European sand dunes. Its roots, or rhizomes, help to hold the windblown sand together to form foredunes.

CRESTED DOG'S-TAIL
Cynosurus cristatus
F: Poaceae

Low-growing apart from its flower stalks, this perennial grass from Europe and W. Asia resists trampling and is often used for lawns.

30 in

COCK'S-FOOT
Dactylis glomerata
F: Poaceae

Often grown in hayfields and pastures, this common grass with distinctive tufted flowerheads is native to Eurasia and N. Africa.

2.5 m
8 1/4 ft

JOB'S TEARS
Coix lacryma-jobi
F: Poaceae

Native to C. Asia, this grass is grown around the tropics as a cereal or fodder crop. The hard seeds of wild plants are used as beads.

young seeds

HARE'S TAIL
Lagurus ovatus
F: Poaceae

The distinctive soft-haired flowerheads of this mainly coastal Mediterranean grass make it popular in dried flower arrangements.

23 1/2 in

DRIED SEEDHEAD

GIANT REED
Arundo donax
F: Poaceae

Originally from C. Asia, this outsize marshland grass has been widely planted elsewhere. Its woody stems have many traditional uses.

6 m
20 ft

TALL, BROAD LEAF

EVERGREEN LEAVES

BLACK BAMBOO
Phyllostachys nigra
F: Poaceae

Like all the bamboos, this black-stemmed species has hard, woody stems. It is native to E. and S. China. Bamboos are the fastest growing woody plant, growing up to 90 cm (35 in) a day.

23 ft

FINGER-THICK CANE

THREE-AWNED GOAT GRASS
Aegilops neglecta
F: Poaceae

A relative of wheat, this low-growing, drought-resistant annual grass is native to the Mediterranean and Middle East.
