

» RANUNCULALES

PHEASANT'S EYE
Adonis annua
F: Ranunculaceae

An increasingly uncommon annual species, pheasant's eye is found in cultivated and waste ground in W. Europe and N.W. Africa.

KINGCUP
Caltha palustris
F: Ranunculaceae

Kingcup, or marsh marigold, inhabits marshes, ditches, wet woods, and wet grassland in much of Europe, Asia, and N. America.

PASQUE FLOWER
Pulsatilla vulgaris
F: Ranunculaceae

Chalk slopes with short turf are the home of pasque flower, a perennial species native to Europe and W. Asia.

MEADOW BUTTERCUP
Ranunculus acris
F: Ranunculaceae

Found in much of Europe and temperate regions of W. Asia, this perennial species is found in damp grassland.

SCARLET LARKSPUR
Delphinium cardinale
F: Ranunculaceae

Also known as cardinal larkspur where it grows in California, USA, and Baja California, Mexico, this short-lived perennial is found on dry hillsides.

FIELD LOVE-IN-A-MIST
Nigella arvensis
F: Ranunculaceae

This annual species is native to cultivated and disturbed ground in C. and S. Europe. It sprouts in gardens elsewhere from spilled bird seed.

SEEDHEAD

CLIMBING STEMS

TRAVELLER'S JOY
Clematis vitalba
F: Ranunculaceae

Also known as "old man's beard" for its grey, feathery fruits, traveller's joy is a woody climber found in wood edges and hedgerows in Europe and N. Africa.

ROCKET LARKSPUR
Delphinium ambiguum
F: Ranunculaceae

Growing on cultivated and disturbed ground on light soils, rocket larkspur is an annual native to the Mediterranean region.

COMMON MEADOW RUE
Thalictrum flavum
F: Ranunculaceae

This perennial species grows in wet meadows and fens beside fresh water in Europe and temperate regions of Asia.

WINTER ACONITE
Eranthis hyemalis
F: Ranunculaceae

This tuberous perennial species is found in damp woodland and shady places in C. Europe. It flowers in late winter (hence its common name) and early spring.

flower forms on a long spike

stem, leaves, and root are toxic

MONKSHOOD
Aconitum napellus
F: Ranunculaceae

Named for its helmeted flowers, monkshood inhabits damp woods and streamsides in Europe. It is an extremely poisonous perennial species.
