

6m/20ft

OLEASTER*Elaeagnus angustifolia*
F: Elaeagnaceae

Native to Eurasia, this spreading, deciduous tree has spiny shoots, covered in silver scales. Its egg-shaped, yellow-red fruits are edible.

2m
6½ft**HEMP***Cannabis sativa*
F: Cannabaceae

Originating from C. and W. Asia, this annual is a source of cannabis from its leaves, fibre for making rope, and oil is extracted from its seeds.

7m/23ft

FEMALE PLANT
AND FLOWERSMALE PLANT
AND FLOWERS**HOP***Humulus lupulus*
F: Cannabaceae

This climbing perennial from N. Europe and N. Asia is widely naturalized elsewhere. The cone-like female flower or hop is used to flavour and preserve beer.

20m
65ft

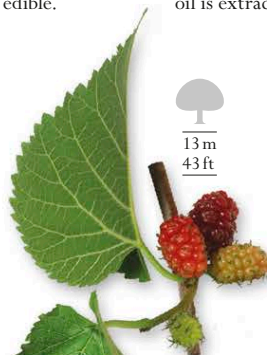

young fruit

JACKFRUIT*Artocarpus heterophyllus*
F: Moraceae

From lowland S.E. Asia, this tree yields the largest tree-borne fruit, weighing up to 50 kg (110 lb) and 90 cm (36 in) long when ripe.

GLOSSY
LEAFFLESHY
FRUIT**COMMON FIG***Ficus carica*
F: Moraceae

As with most figs, flowers of this Mediterranean and Asian species develop inside a flask-shaped receptacle and are pollinated by a single species of wasp.

13m
43ft**BLACK MULBERRY***Morus nigra*
F: Moraceae

This deciduous, spreading tree, widely cultivated for its rich-flavoured fruits, is native to the Middle East. It has bumpy, fissured orange bark.

30m
100ft**SACRED FIG***Ficus religiosa*
F: Moraceae

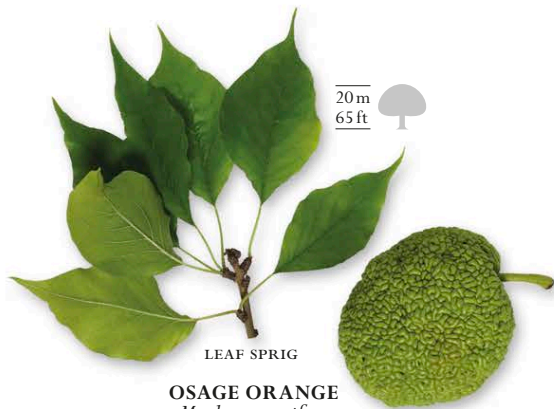

Under this sacred tree, Buddha is said to have gained enlightenment. Native to S.E. Asia, its flowers, then its fruits, are enclosed within purple, flecked figs.

15m/50ft

CONICAL
FRUITS**PAPER MULBERRY***Broussonetia papyrifera*
F: Moraceae

Fine paper is made from the inner bark of this tree from Japan and S.E. China. Male catkins produce large quantities of wind-dispersed pollen.

SPRIG OF FEMALE
FLOWERS20m
65ft

LEAF SPRIG

OSAGE ORANGE*Maclura pomifera*
F: Moraceae

Native to S.E. USA, this tree is used for hedging and its roots and wood were valued by native Americans.

INEDIBLE
FRUIT

10m/33ft

JUJUBE*Ziziphus jujuba*
F: Rhamnaceae

This thorny, shrubby tree is widely cultivated for its fruits in China and Korea. The immature, smooth, oval, green stoned fruit tastes like apple.

8m/26ft

COMMON BUCKTHORN*Rhamnus cathartica*
F: Rhamnaceae

A shrubby, invasive tree that has spine-tipped shoots, tiny yellow-green flowers, and black berries. It is native to Europe, Asia, and N.W. Africa.

75cm
30in**NEW JERSEY TEA***Ceanothus americanus*
F: Rhamnaceae

This bush from eastern N. America has purple, three-lobed capsules, containing seeds. Its red roots and hairy leaves have been used to make tea.
