

» ROSALES

CHINESE PHOTINIA
Photinia serratifolia
F: Rosaceae

A plant of Chinese forests, this tree is commonly cultivated for ornamental purposes. Its dense wood is used in furniture making.

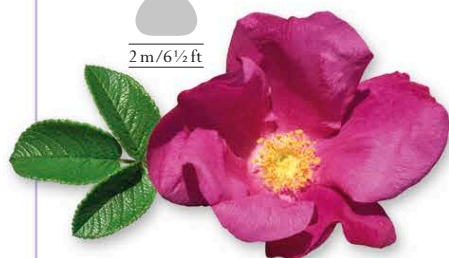

8 m/26 ft

PRAIRIE CRAB APPLE
Malus ioensis
F: Rosaceae

One of several crab apples native to N. America, this species is cultivated for its rather tart fruits.

2 m/6½ ft

JAPANESE ROSE
Rosa rugosa
F: Rosaceae

Tolerant of salt spray, this rose from E. Asia is often planted as a hedge near the sea. It has prickly stems and pink flowers with wrinkled petals.

WHITE OR PINK FLOWERS

3 m/10 ft

DOG ROSE
Rosa canina
F: Rosaceae

The thorny, arching branches of this rose are familiar in hedgerows in Europe, Asia, and N. Africa. This plant is also naturalized in N. America.

SILVERWEED
Potentilla anserina
F: Rosaceae
This silky-haired, creeping perennial grows in wasteland, pastures, and dunes in Europe, Asia, and N. America, and has been widely introduced elsewhere.

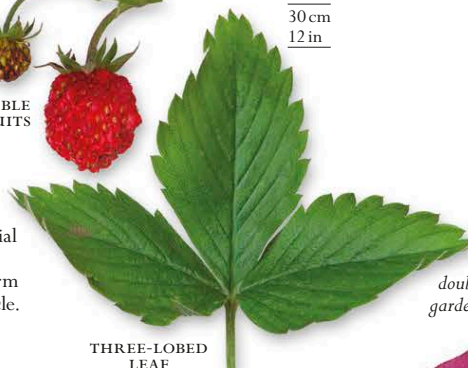

80 cm/32 in

STRAWBERRY
Fragaria vesca
F: Rosaceae

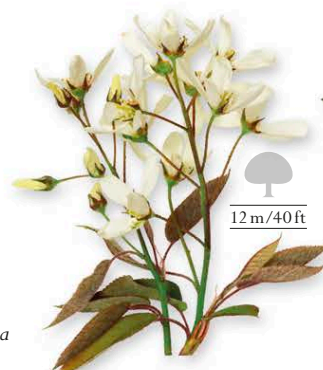

The wild strawberry is a perennial in European and N. American woodlands. Tiny edible fruits form from the swollen flower receptacle.

EDIBLE FRUITS

THREE-LOBED LEAF

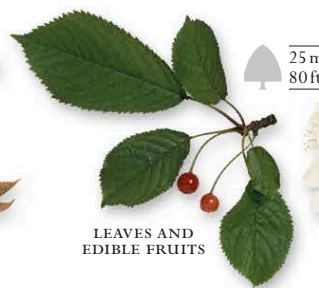

30 cm/12 in

SNOWY MESPIUS
Amelanchier lamarckii
F: Rosaceae

Frothy clusters of star-shaped flowers in spring are followed by dark red berries in summer in this showy tree from eastern N. America.

12 m/40 ft

LEAVES AND EDIBLE FRUITS

25 m/80 ft

SPRING FLOWERS

WILD CHERRY
Prunus avium
F: Rosaceae

The wild ancestor of orchard cherries grows in woods and hedges in Europe, Asia, and N. Africa and is naturalized in N. America.

ORCHARD PLUM
Prunus domestica
F: Rosaceae

These trees originated as a cross between the cherry plum of China and the European blackthorn, but without the sharp thorns of the latter.

12 m/40 ft

double flower garden variety

fragrant, deep pink flower

APOTHECARY'S ROSE
Rosa gallica var. *officinalis*
F: Rosaceae

A popular garden plant, this European parent of many floribunda and hybrid tea roses has a long pedigree. "Attar of roses" is a fragrant oil distilled from its petals.

SWEET BRIAR
Rosa rubiginosa
F: Rosaceae

One of the most deeply coloured wild roses, sweet briar enlivens hedgerows and scrub around Europe, Asia, and Africa. Glands on its leaves produce an apple scent when crushed.
