

SUGAR MAPLE
Acer saccharum
F: Sapindaceae

This tree is native to N.E. USA and S.E. Canada. Maple syrup is made by boiling the sap collected from the tree in spring.

115 ft

JAPANESE MAPLE
Acer palmatum
F: Sapindaceae
Centuries of breeding have produced many cultivated varieties of this native Japanese tree, with varying leaf shapes and spectacular autumn colours.

16 m
52 ft

GOLDEN-RAIN TREE
Koelreuteria paniculata
F: Sapindaceae

This showy tree from E. Asia is much planted in temperate regions for its cascading yellow blossoms and distinctive bladder-like seed pods.

12 m
40 ft

SYCAMORE
Acer pseudoplatanus
F: Sapindaceae
Native to mountain woods in Europe and Asia, sycamore is widely planted elsewhere. Its winged seeds spread in the wind.

FLOWERING STEM

WINGED SEEDS

YELLOWHORN
Xanthoceras sorbifolium
F: Sapindaceae

This small tree grows wild in China. Its scientific name records its leaves, which resemble those of rowan (*Sorbus*).

LYCHEE
Litchi chinensis
F: Sapindaceae

Probably originating in S. China, this tree is cultivated for its fruits. Their sweet flesh is encased within a tough shell.

HORSE CHESTNUT
Aesculus hippocastanum
F: Sapindaceae

Native to S.E. Europe, this tree is often planted for shade along city streets. Its fruits resemble chestnuts but are hard and inedible.

130 ft

CONKER IN SPIKY SHELL

WHITE SPRING FLOWERS

EDIBLE NUTS

JAVA ALMOND
Canarium indicum
F: Burseraceae

Native to rainforests in the Pacific islands, this is one of the region's most useful trees, providing timber, oil, and edible nuts.

130 ft

BRIGHT GREEN LEAVES

TREE OF HEAVEN
Ailanthus altissima
F: Simaroubaceae

Hailing from China, this slightly rank-smelling tree is planted along city streets because it endures pollution and most soil types.

20 m
65 ft

BITTERWOOD
Quassia amara
F: Simaroubaceae

Boiled extracts from the bark and leaves of this tree are used to make tonics against malaria in tropical America.
