

EUROPEAN HONEYSUCKLE
Lonicera periclymenum
F: Caprifoliaceae

A deciduous shrub of woods and hedgerows in Europe and N. Africa, honeysuckle scrambles over other plants to reach sunlight before flowering.

CORAL HONEYSUCKLE
Lonicera sempervirens
F: Caprifoliaceae

This slender vine scrambles high up forest trees in E. USA. Its trumpet-shaped red flowers, with yellow interiors, attract hummingbirds for pollination.

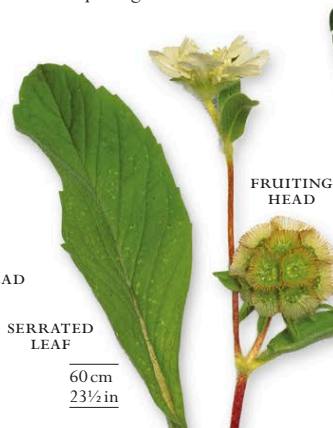

FIELD SCABIOUS
Knautia arvensis
F: Caprifoliaceae

Flowerheads of this hairy perennial have larger outer petals than inner ones. It grows in dry pastures from Europe to Siberia.

SNOWBERRY
Symphoricarpos albus
F: Caprifoliaceae

Native from Alaska to Colorado, USA, but widely planted elsewhere, this deciduous, suckering shrub has dense heads of pink flowers, ripening to white berries.

CARMEL DAISY
Scabiosa prolifera
F: Caprifoliaceae

The pale yellow flowerheads of this robust E. Mediterranean annual have large outer petals with smaller inner florets. It grows around fields.

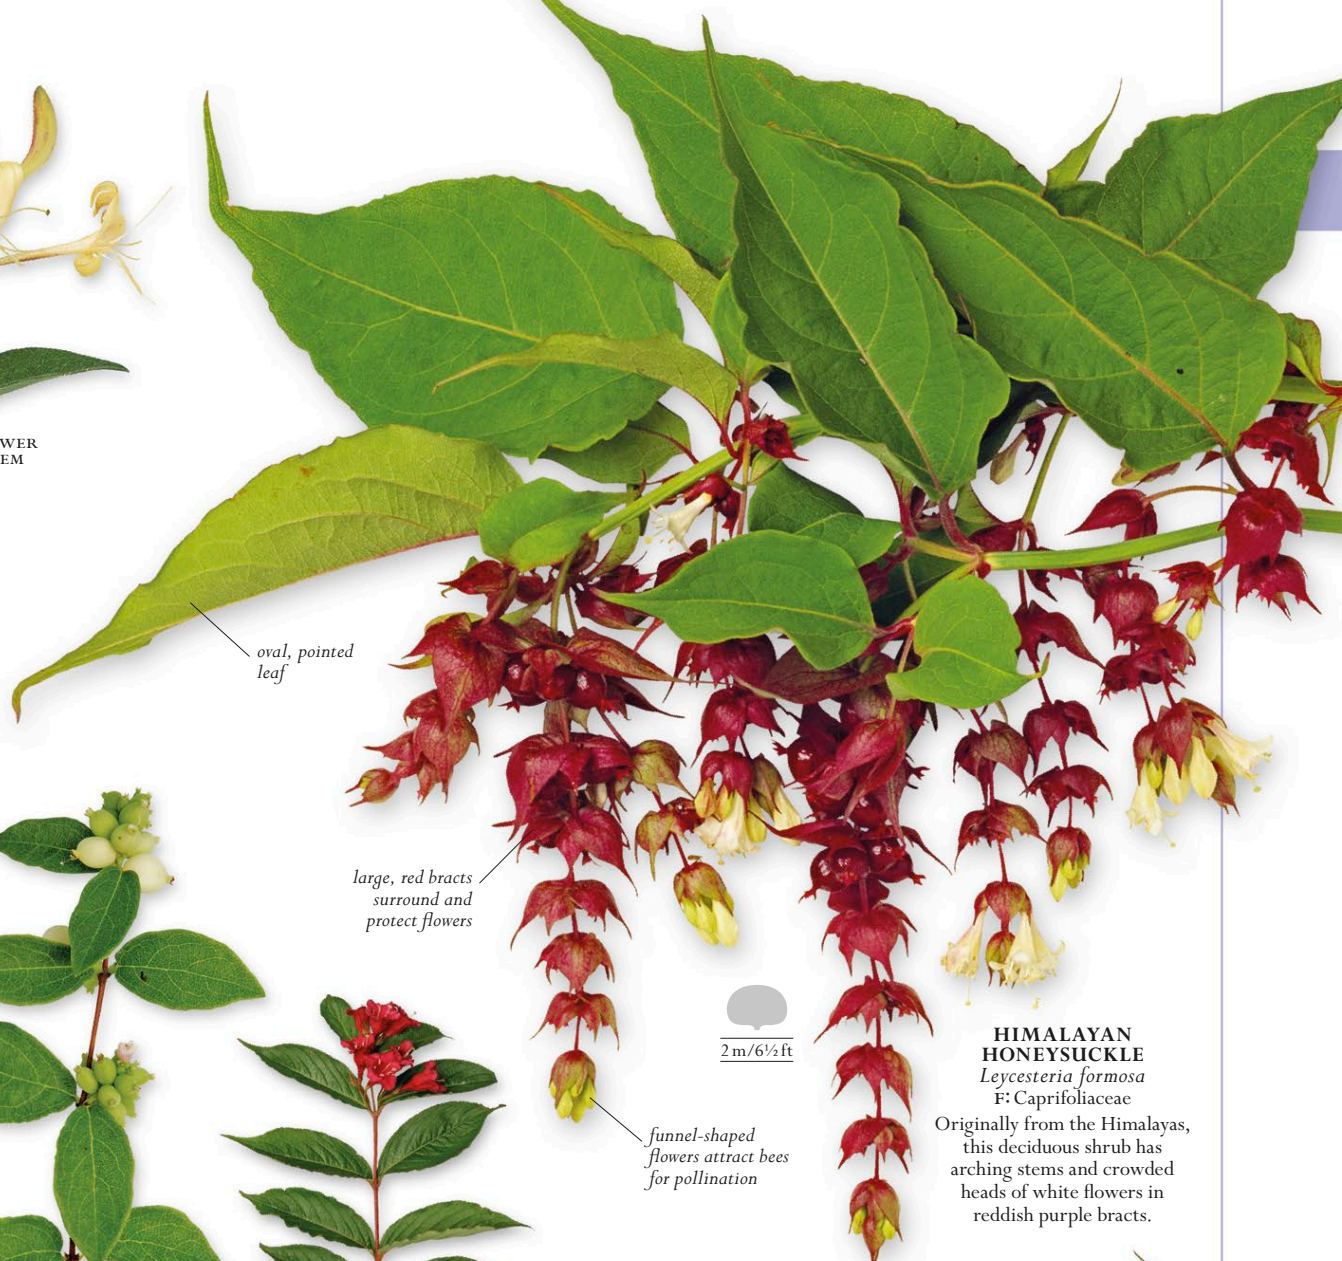

WEIGELA
Weigela florida
F: Caprifoliaceae

Originally from China and Korea, this deciduous shrub has clusters of funnel-shaped flowers that are deep rose in colour, sometimes with a yellow throat.

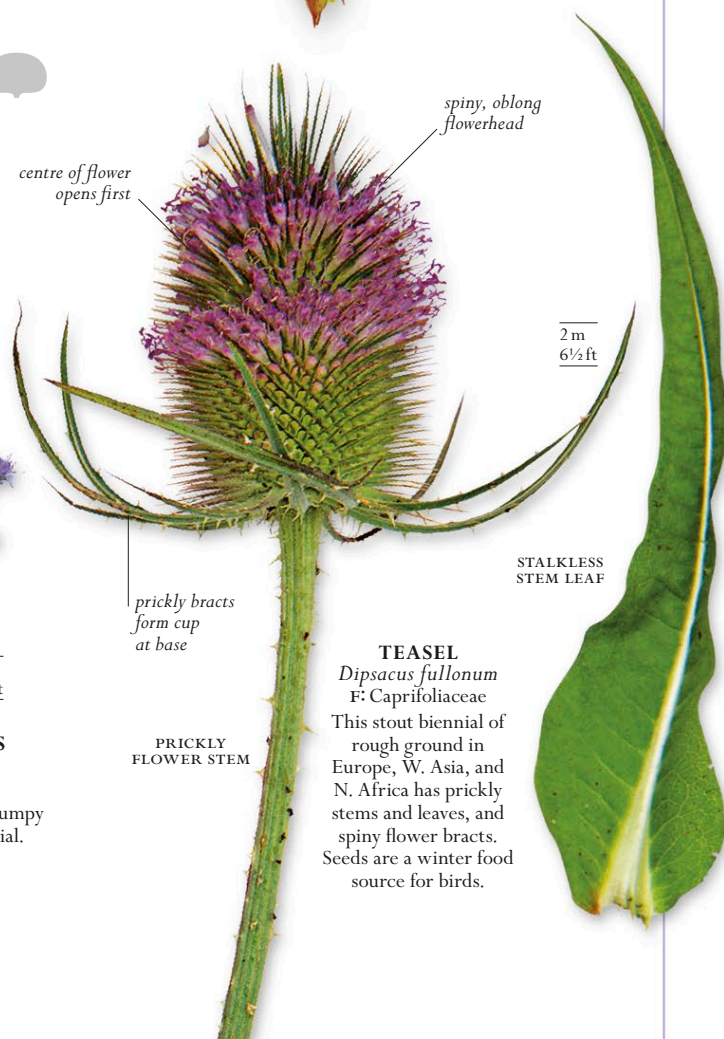

DEVIL'S-BIT SCABIOUS
Succisa pratensis
F: Caprifoliaceae

The devil supposedly bit off the stumpy rootstock of this downy perennial. It grows in damp soils across Europe and N. Africa.

HIMALAYAN HONEYSUCKLE
Leycesteria formosa
F: Caprifoliaceae

Originally from the Himalayas, this deciduous shrub has arching stems and crowded heads of white flowers in reddish purple bracts.

TEASEL
Dipsacus fullonum
F: Caprifoliaceae

This stout biennial of rough ground in Europe, W. Asia, and N. Africa has prickly stems and leaves, and spiny flower bracts. Seeds are a winter food source for birds.
