

cap frequently splits as it ages

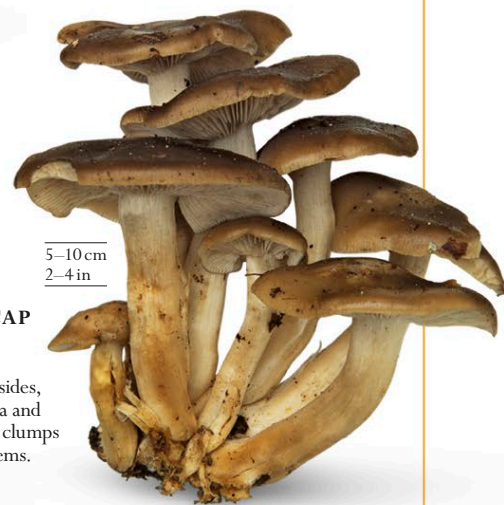

PINK DOME CAP

Calocybe carnea
F: Lyophyllaceae

This species grows in short grass in Eurasia and N. America. Its smooth cap and fibrous stem are rose-pink and the gills are white.

3–12 cm
1¼–4¾ in

5–10 cm
2–4 in

CLUSTERED DOME CAP

Lyophyllum decastes
F: Lyophyllaceae

Common on roadsides, pathsides, and disturbed soils in Eurasia and N. America, this fungus forms clumps of tough caps with stout stems.

SILKY PIGGYBACK

Asterophora parasitica
F: Lyophyllaceae

One of two well-known parasitic species to live on rotten fruitbodies of brittle-caps, this fungus from Eurasia and N. America has a rounded silky cap.

HORSEHAIR PARACHUTE

Gymnopus androsaceus
F: Marasmiaceae

Found in Eurasia, this fungus has a distinctive black hair-like stem, while its radially grooved cap is pale pinkish brown.

0.3–1 cm
⅛–¾ in

cap depressed at centre

¾–2 in

FAIRY RING CHAMPIGNON

Marasmius oreades
F: Marasmiaceae

This classic fairy-ring mushroom is common in open grass in Eurasia and N. America. It has fleshy, beige caps with thick gills.

0.5–2 cm
3/16–¾ in

wiry stem

0.5–1.5 cm
3/16–½ in

HAIRY PARACHUTE

Crinipellis scabella
F: Marasmiaceae

Found on dead stems of grasses, this recognizable fungus is from Eurasia. It has a small cap and a long, slender stem covered with dense, bristling brown hair.

0.5–1 cm
3/16–¾ in

COMMON BIRD'S NEST

Crucibulum laeve
F: Nidulariaceae

Forming miniature nests with spore-filled, egg-like cases, this common species may be hard to spot on woody debris. It occurs in Eurasia and N. America.

0.5–1 cm
3/16–¾ in

FLUTED BIRD'S NEST

Cyathus striatus
F: Nidulariaceae

This fungus is recognized by its hairy, brown, and tall fluted nests containing 10–15 egg-like cases. It occurs on woody debris across Eurasia and N. America, but is not common.

GARLIC PARACHUTE

Mycetinis alliaceus
F: Marasmiaceae

This species grows in beech woods in Eurasia. It has a tall, slender, blackish stem and a strong odour of rancid garlic.

1.5–4 cm
½–1½ in

COLLARED PARACHUTE

Marasmius rotula
F: Marasmiaceae

Like little parachutes, this mushroom's rounded, depressed caps are radially grooved. Its tough stems are attached to woody debris. It occurs in Eurasia and N. America.
