

**GREEN
HIGHLAND RACER**
Drymobius chloroticus

This fast, agile snake is from the rainforests of C. America. It is usually found near water, where it feeds on frogs.

1 m
3¼ ft

long,
slender body

**WESTERN INDIGO
SNAKE**

Drymarchon corais

This is one of the longest snakes in N. America. It often shares a burrow with the gopher tortoise.

4½ ft

3 m
10 ft

NORTHERN WATER SNAKE
Nerodia sipedon

This aquatic, viviparous species from eastern N. America is active throughout the day and the night. It feeds on amphibians and fish.

BANDED FLYING SNAKE
Chrysopelea pelias

Despite its name, this S. Asian snake does not actively fly. Instead, it glides down from high branches by making its underside concave.

1.2 m
4 ft

MUD SNAKE
Farancia abacura

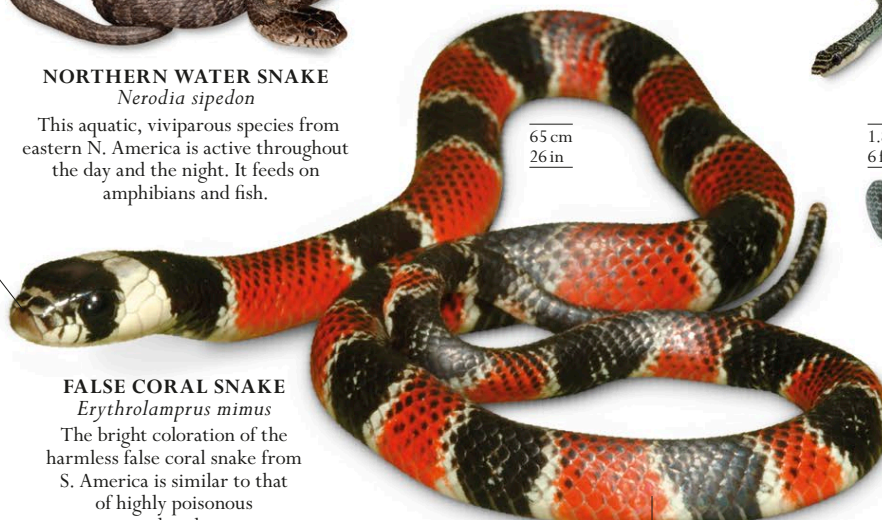

This N. American snake preys on aquatic salamanders, grasping them with strongly curved teeth. Females remain coiled around their eggs until they hatch.

2.1 m
7 ft

MOELLENDORFF'S RATSNAKE
Elaphe moellendorffi

This species is from dry limestone regions of China and Vietnam. It has an elongated snout and a relatively long tail.

1.8 m
6 ft

99 cm
3¼ ft

**NORTHERN
CAT-EYED SNAKE**

Leptodeira septentrionalis

This nocturnal, arboreal species from C. America has large eyes to help it hunt for vertebrates and eggs of tree frogs.

1.3 m
4¼ ft

**BROWN BLUNT-HEADED
VINE SNAKE**

Imantodes cenchoa

The large eyes of this slender snake help it hunt lizards in the dark. It is found in tropical American rainforests.

**REDBACK
COFFEE SNAKE**
Ninia sebae

This harmless snake from C. America has an ability to extend its neck as a form of intimidation.

40 cm
16 in

3 m
10 ft

**FALSE WATER
COBRA**

Hydrodynastes gigas

Native to S. American rainforests, this is a semi-aquatic snake. Like cobras, it can flatten its neck to appear more intimidating.

2 m
6½ ft

GREEN VINE SNAKE
Oxybelis fulgidus

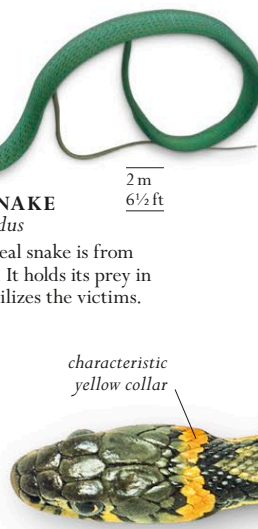

Long and delicate, this arboreal snake is from C. and S. American rainforests. It holds its prey in the air until its venom immobilizes the victims.

1.1 m
3½ ft

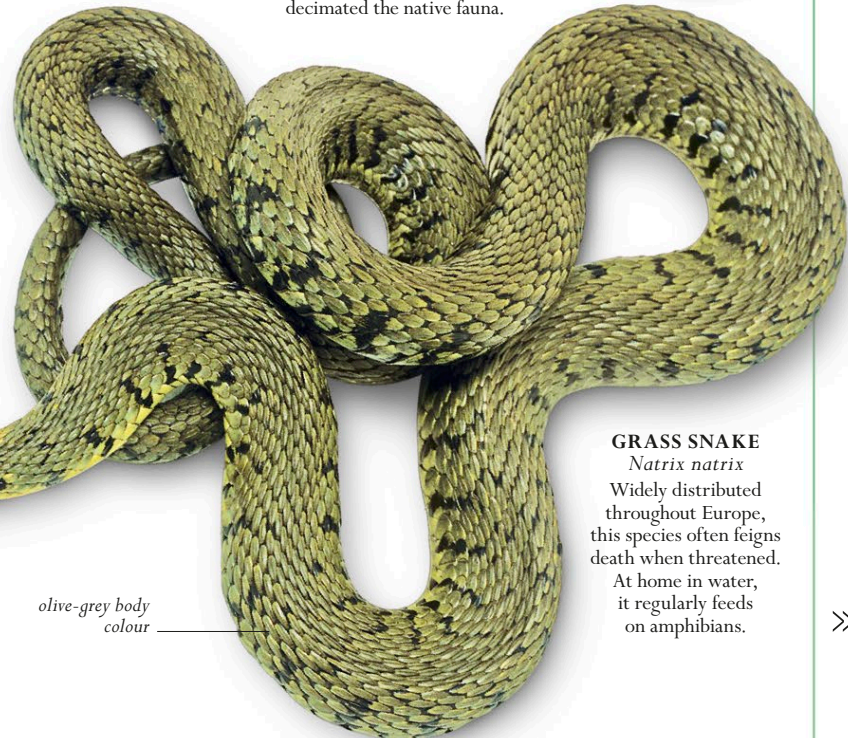

CALICO SNAKE
Oxyrhopus petolarius

This species feeds on lizards and other small vertebrates. It is a terrestrial and diurnal inhabitant of S. American rainforests.
