

52–60 cm
20½–23½ in

EUROPEAN HONEY-BUZZARD

Pernis apivorus
F: Accipitridae

Belonging to a group of tropical raptors that eat bee and wasp larvae, this species breeds in Eurasia and overwinters in Africa.

51–57 cm
20–22½ in

EURASIAN BUZZARD

Buteo buteo
F: Accipitridae

A common raptor, this species has light and dark colour forms. Its northern populations overwinter in tropical Africa and Asia.

dark brown to white coloration

50–65 cm
20–26 in

LONG-LEGGED BUZZARD

Buteo rufinus
F: Accipitridae

This buzzard of semi-deserts and mountains breeds in C. Europe and C. Asia, with some populations migrating to N. Africa in winter.

32–38 cm
12½–15 in

WHITE-TAILED KITE

Elanus leucurus
F: Accipitridae

Typical of its genus, this sharp-browed kite habitually hovers when hunting. It occurs from the USA to S. America, outside the Amazon basin.

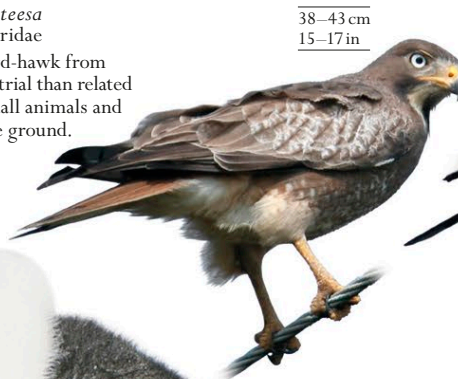

WHITE-EYED BUZZARD

Butastur teesa
F: Accipitridae

This small buzzard-hawk from S. Asia is more terrestrial than related species, hunting small animals and insects on the ground.

white neck ruff

sharply hooked bill

38–43 cm
15–17 in

50–64 cm
20–25 in

SWALLOW-TAILED KITE

Elanoides forficatus
F: Accipitridae

This insect-eating bird of prey is a graceful and agile flier. It breeds in the S.E. USA and C. America, and overwinters in S. America.

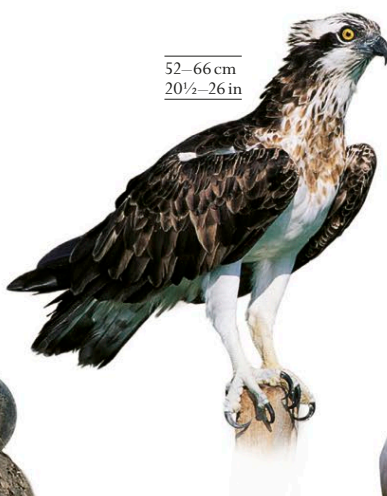

BRAHMINY KITE

Haliastur indus
F: Accipitridae

With a range from India to Australasia, this riverside and coastal scavenger also hunts for live prey such as fish and small mammals.

red-brown tail

43–51 cm
17–20 in

OSPREY

Pandion haliaetus
F: Accipitridae

Found almost worldwide, the fish-eating osprey plunges for its prey and has a reversible outer toe for a better grip of its slippery catch.

1–1.4 m
3¼–4½ ft

52–66 cm
20½–26 in

head plumes

1.3–1.5 m
4¼–5 ft

elongated central tail feathers

long legs

PALM-NUT VULTURE

Gypohierax angolensis
F: Accipitridae

Unusually for a vulture, this African species has a largely vegetarian diet, consisting of oil palm fruit. However, it also feeds on fish and carrion.

60 cm
23½ in

SECRETARY BIRD

Sagittarius serpentarius
F: Accipitridae

One of the few raptors to hunt on the ground, this long-legged bird of African savanna chases small animals, often stamping to disable them.
