

pale fur, with greyish brown markings

NORTHERN LUZON GIANT CLOUD RAT
Phloeomys pallidus

The two species of cloud rat inhabit high forests of the Philippines, but are rarely seen. They are the largest of the mouse-like rodents.

38–43 cm
15–17 in

39–44 cm
15½–17½ in

SOUTHERN LUZON GIANT CLOUD RAT
Phloeomys cumingi

Like the smaller northern species, this rat spends the day in hollow trees or burrows, and has one young at a time.

HOUSE MOUSE
Mus musculus

A highly adaptable species, this small, slim rodent has followed humans all around the world, even living in the sub-Antarctic.

7–10 cm
2¾–4 in

white underparts

ALBINO DOMESTIC MOUSE
Mus musculus

The captive-bred albino house mouse has become common as a pet, and is also widely used in medical and scientific research.

7–10 cm
2¾–4 in

robust body

long whiskers on nose, eyebrows, and cheeks

greyish brown fur

14–29 cm
5½–11½ in

BROWN RAT
Rattus norvegicus

Also called the common rat, this is now a global pest, having travelled on ships and colonized even remote islands.

9–14 cm
3½–5½ in

TYPICAL STRIPED GRASS MOUSE
Lemniscomys striatus

This distinctive, boldly marked species is a common inhabitant of grassy habitats across most of sub-Saharan Africa.

9–13 cm
3½–5 in

YELLOW-NECKED FIELD MOUSE
Apodemus flavicollis

This nocturnal woodland species is difficult to distinguish from the wood mouse over much of its European range.

9–11 cm
3½–4¼ in

WOOD MOUSE
Apodemus sylvaticus

This is the most abundant wild mouse in Europe, living in every terrestrial habitat, even in the mountains.

small ears

HARVEST MOUSE
Micromys minutus

Europe's smallest mouse, this species lives in a variety of grassy habitats, including reed beds and cornfields.

5–8 cm
2–3¼ in

11–26 cm
4½–10 in

BLACK RAT
Rattus rattus

Often called the "ship rat" because of its ability to live aboard ships, this is also the species whose fleas transmit bubonic plague.

30–35 cm
12–14 in

MALAGASY GIANT JUMPING RAT
Hypogeomys antimena

The sole species of giant hopping rat, this is the largest rodent in Madagascar, found only in the sandy forests of the west coast.
