

20–25 cm
8–10 in

**COTTON-TOP
TAMARIN**

Saguinus oedipus

Inhabiting a very restricted range in N.W. Colombia and Panama, this species feeds mainly on insects and fruits.

GOLDEN-HANDED TAMARIN
Saguinus midas

Found in northeast S. America, this tamarin has brightly coloured hands and feet, with claws on all digits except the big toe, which has a nail.

21–28 cm
8½–11 in

20–27 cm
8–10½ in

banded tail

**SADDLE-BACK
TAMARIN**
Saguinus fuscicollis

This tamarin lives in secondary forest and forest edges in the upper Amazon basin, foraging for insects, fruits, nectar, and tree sap and gum.

**GOLDEN LION
TAMARIN**
Leontopithecus rosalia

Among the most endangered monkeys in the world, this species is found only in the Atlantic coastal forest of S.E. Brazil.

26–33 cm
10–13 in

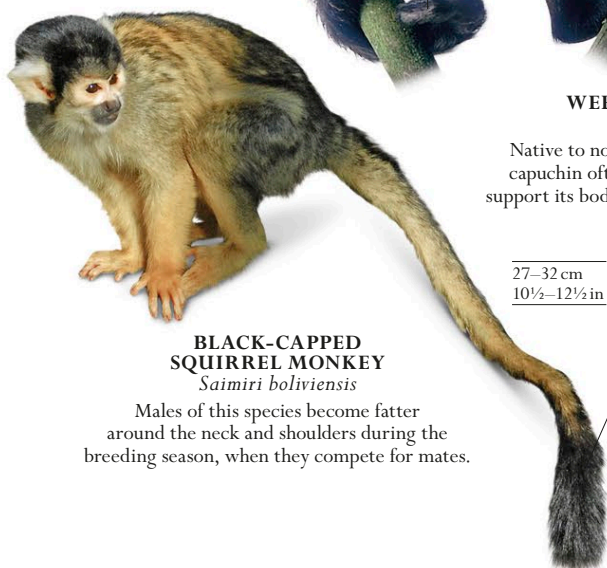

22–26 cm
9–10 in

**GOLDEN-HEADED
LION TAMARIN**
Leontopithecus chrysomelas

Restricted to the Atlantic forest of southern Bahia in N.E. Brazil, this primate raises its mane to look bigger when in danger.

SQUIRREL MONKEYS AND CAPUCHINS

The family Cebidae once contained several monkey groups, but now only the squirrel monkeys and capuchins remain. They have large ears, a long tail, and forelimbs that are shorter than the hind limbs. Squirrel monkeys, of which there are eight Central and South American species, belong to the genus *Saimiri*. The capuchins comprise two genera, the tufted *Sapajus* and the untufted *Cebus*.

**BLACK-CAPPED
SQUIRREL MONKEY**
Saimiri boliviensis

Males of this species become fatter around the neck and shoulders during the breeding season, when they compete for mates.

naked face

tail

37–46 cm
14½–18 in

WEEPER CAPUCHIN
Cebus olivaceus

Native to north-central S. America, this capuchin often uses its prehensile tail to support its body while feeding with its hands.

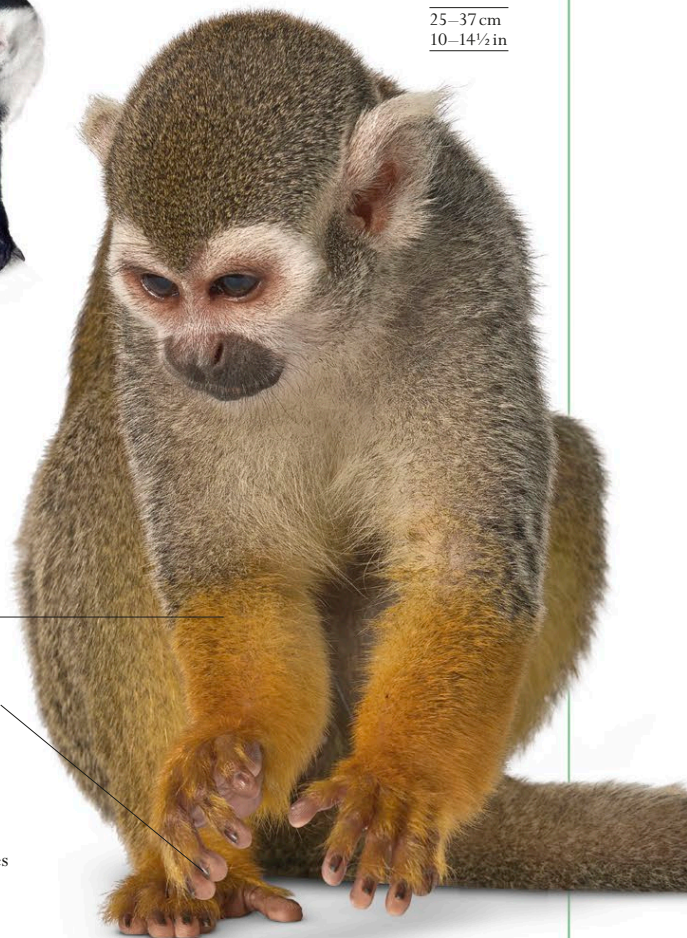

33–45 cm
13–18 in

**WHITE-HEADED
CAPUCHIN**
Cebus capucinus

The only capuchin found in C. America, the range of this primate extends from Honduras to the coasts of Colombia and Ecuador.

25–37 cm
10–14½ in

bright yellow limbs

nails on digits

**GUIANAN SQUIRREL
MONKEY**
Saimiri sciureus

A gregarious species, this monkey lives in large groups in a wide variety of forests in northern S. America to north-eastern S. America.
