3–4 ft

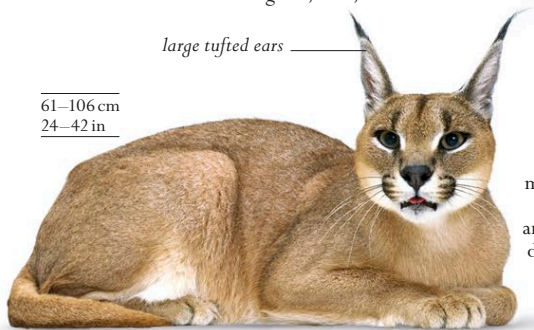

SNOW LEOPARD
Uncia uncia

At home in the remote high mountains of C. Asia, the snow leopard lives alone and hunts wild sheep and goats, deer, and marmots.

large tufted ears

61–106 cm
24–42 in

CARACAL
Caracal sp.

Nocturnal hunters of medium-sized prey, such as hyraxes and small antelope, caracals occupy dry scrublands in Africa and S.W. Asia.

short tail

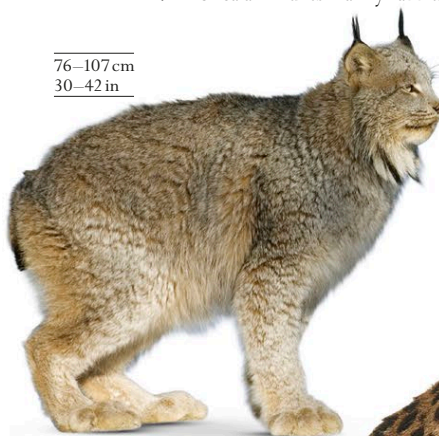

BAY CAT
Catopuma badia

This rare cat has two colour morphs, grey and the more common red. It is found only on the island of Borneo.

53–67 cm
21–26 in

76–107 cm
30–42 in

CANADIAN LYNX
Lynx canadensis

The Canadian lynx inhabits dense forests and tundra. Its numbers fluctuate with the availability of its preferred prey, the snowshoe hare.

CHEETAH
Acinonyx jubatus

The fastest animal on four legs, reaching 102 kph (63 mph), the cheetah uses speed to catch antelope on the African savanna.

1.2–1.5 m

small head with
high-set eyes

80–110 cm
32–43 in

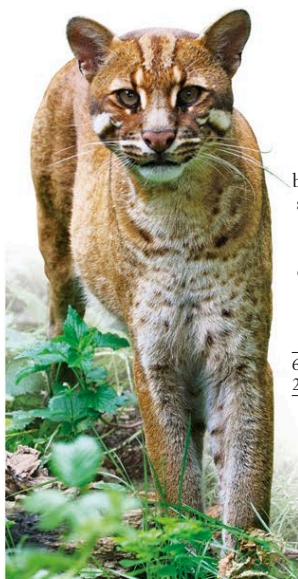

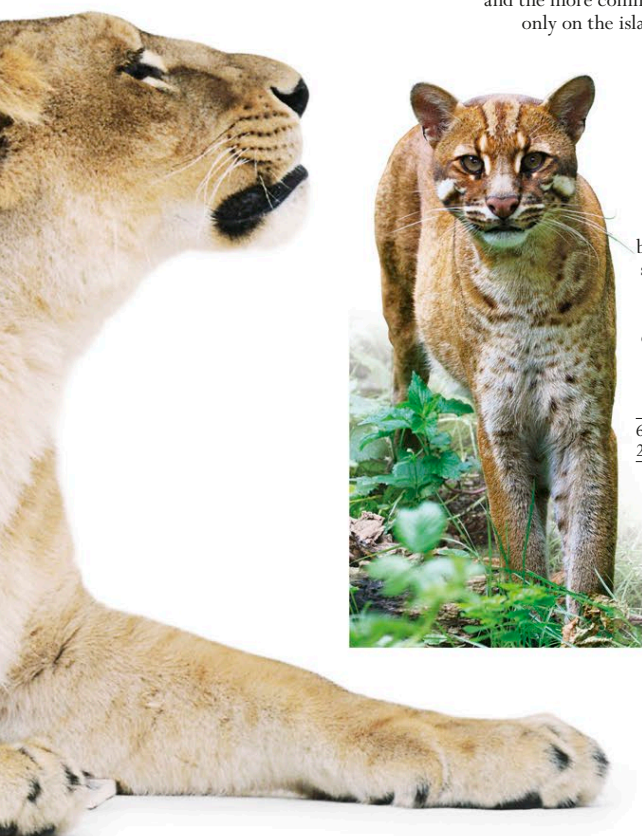

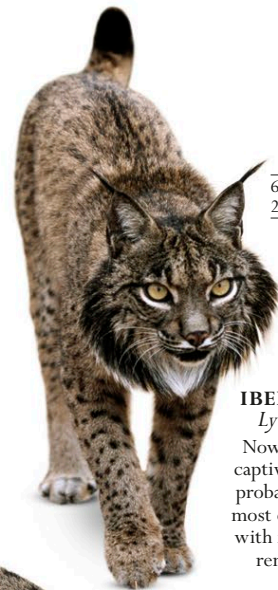

EURASIAN LYNX
Lynx lynx

This large lynx is big enough to tackle small deer. One kill will feed an individual for about a week.

68–82 cm
27–32 in

IBERIAN LYNX
Lynx pardinus

Now being bred in captivity, this lynx is probably the world's most endangered cat, with fewer than 400 remaining wild in Spain.

ASIAN GOLDEN CAT
Catopuma temminckii

This large golden brown, occasionally spotted, cat inhabits forested parts of S.E. Asia. Pairs co-operate to hunt and rear young.

66–105 cm
26–41¼ in
