77–87 cm
30–34 in

KALAHARI SPRINGBOK
Antidorcas hofmeyri

With its numbers much reduced by hunting, this agile antelope, with lyre-shaped horns, browses the arid lands of southern Africa.

53–67 cm
21–26 in

SERENGETI THOMSON'S GAZELLE
Eudorcas nasalis

The most numerous gazelle on the plains of E. Africa, this species has a broad black stripe on its sides.

60–85 cm
23½–34 in

BLACKBUCK
Antilope cervicapra

With the ability to reach speeds of 80kph (50 mph), the blackbuck inhabits grassland and open woodland in India and Pakistan.

35–45 cm
14–18 in

DORCAS GAZELLE
Gazella dorcas

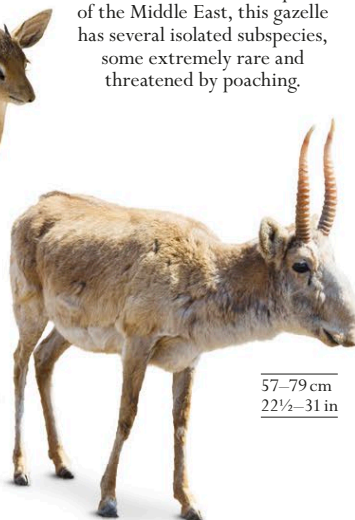

Inhabiting deserts from N. Africa to the Middle East, this small gazelle can survive without drinking, taking moisture from its food.

55–65 cm
22–26 in

MOUNTAIN GAZELLE
Gazella gazella

From the mountains and plains of the Middle East, this gazelle has several isolated subspecies, some extremely rare and threatened by poaching.

57–79 cm
22½–31 in

WESTERN SAIGA
Saiga tatarica

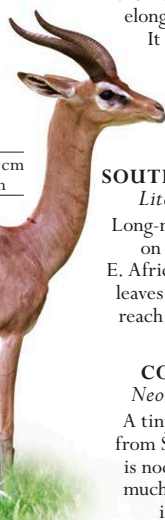

Now highly endangered and found only in western Asia, this saiga's enlarged, flexible nose warms cold winter air and filters out summer dust.

GÜNTHER'S DIK-DIK
Madoqua guentheri

A dik-dik of the E. African semi-deserts, this species has a long, elastic muzzle that can be inflated in order to regulate its temperature.

DAMARA DIK-DIK
Madoqua damarensis

A tiny antelope, named for its sharp alarm note, the Damara dik-dik has an elongated, mobile snout. It forms territorial pairs.

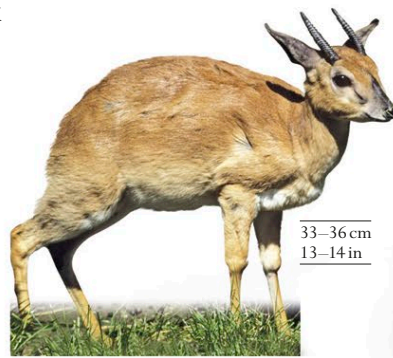

80–105 cm
32–41 in

SOUTHERN GERENUK
Litocranius walleri

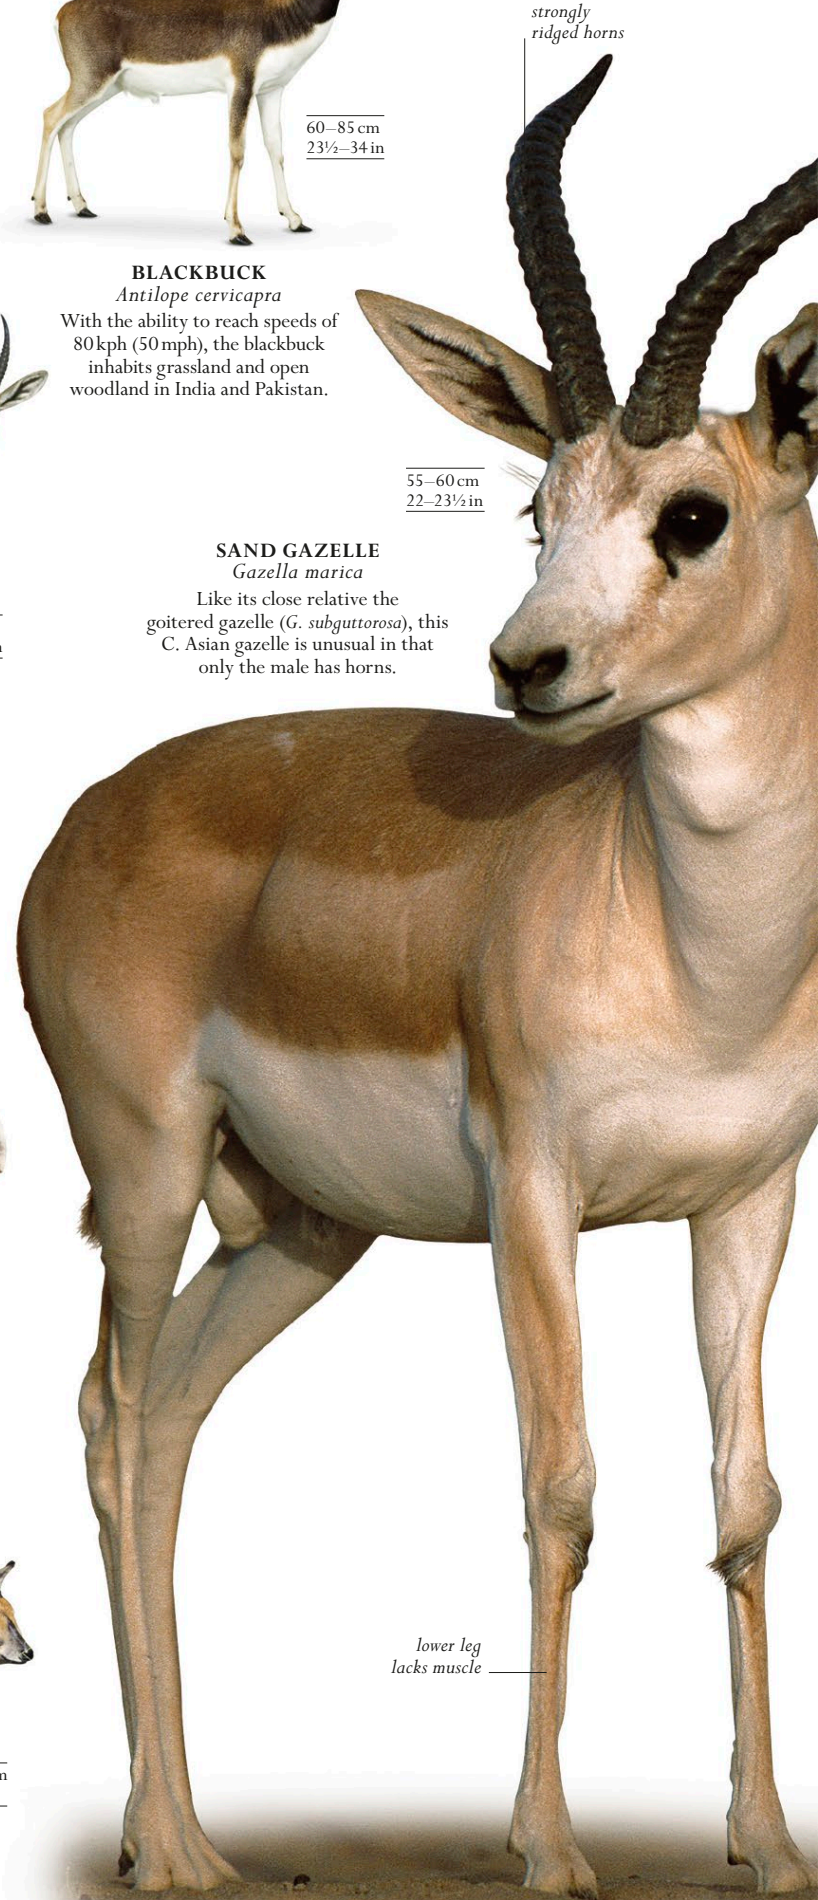

Long-necked and standing on its hind legs, the E. African gerenuk browses leaves growing out of the reach of other antelopes.

COASTAL SUNI
Neotragus moschatus

A tiny, reddish antelope from S.E. Africa, the suni is nocturnal and spends much of its time hidden in dense scrub.

33–36 cm
13–14 in

55–60 cm
22–23½ in

SAND GAZELLE
Gazella marica

Like its close relative the goitered gazelle (*G. subgutturosa*), this C. Asian gazelle is unusual in that only the male has horns.

strongly
ridged horns

lower leg
lacks muscle
