» PARROTS AND COCKATOOS

RED-TAN PARROT
Desorptionis atricapilla
F-Pittaciidae

Possibly related more closely to macaws than to other short-tailed parrots, this S. American parrot raises a red neck ruff when excited.

18-42 cm
15-18 in.

TURQUOISE PARROT
Notholopha pulchella
F-Pittaciidae

A member of a group of small, green grass parrots from Australia, the turquoise parrot is an open woodland bird from the southeast of the continent.

ROSE-RINGED PARAKEET
Ptilinopus roseus
F-Pittaciidae

This is the most widespread Asian parakeet that makes westward into N. Africa. This species has also been introduced in Europe.

40-47 cm
16-19 in.

MASKED SHINING PARROT
Prinops persimilis
F-Pittaciidae

One of the three species of shining parrots restricted to Fiji, this parrot is declining in numbers due to loss of its native forest.

40 cm
16 in.

EASTERN ROSELLA
Platycercus eximius
F-Pittaciidae

Rosellas are broad-tailed parrots with a range from Australia to nearby Pacific islands. A typical rosella, this variable Australian bird has white cheeks.

blue plumage and upperparts

10 cm
4 in.

GREY PARROT
Ptilinopus erithacus
F-Pittaciidae

A native of African rainforests, this highly intelligent species is an accomplished mimic. This has led to its exploitation in the bird trade.

white face

11 cm
4 in.

PRINCESS PARROT
Polytelus amabilis
F-Pittaciidae

A seasonal forest dweller from central Australia, this bird follows watercourses and gullies near open grass. It often breeds in small colonies in eucalyptus trees.

YELLOW-COLLARED LOVEBIRD
Agapornis nectaralis
F-Pittaciidae

Lovebirds are small African parrots that live in small flocks. Unlike most parrots, this Tanzanian species builds a nest—a domed structure in a tree cavity.

ROSY-FACED LOVEBIRD
Agapornis roseicollis
F-Pittaciidae

This social lovebird from dry woodland and semi-desert habitats of S.W. Africa habitually gathers near watering holes.

17-18 cm
6½-7 in.

grey-black underparts

SUPERB PARROT
Polytelus swainsoni
F-Pittaciidae

This S.E. Australian bird belongs to a group of long-tailed Australian parrots and breeds in red gum forests. It is rapidly declining in number.

yellow underparts

BROWN-NECKED PARROT
Polytelus robustus
F-Pittaciidae

The largest of a group of mainly green-grey parrots of Africa, this bird occurs in forests from Gambia to the Cape of Good Hope.

15-37 cm
14-14½ in.
