

KEY

 NOTABLE TEA-PRODUCING REGIONS

 AREA OF PRODUCTION

LOWER ASSAM

The regions surrounding Nalbari, Bongaigaon, and the state's capital city, Guwahati, make up the Lower Assam tea-growing region.

NORTH BANK

The tea gardens of Dibrugarh on the North Bank of the Brahmaputra River are low lying and mostly produce CTC teas destined for teabags.

ARUNACHAL PRADESH

NORTH BANK

UPPER ASSAM

UPPER AND CENTRAL ASSAM

These two regions together produce the largest amounts of the best-quality tea in Assam. Tocklai Tea Research Institute in Jorhat is at the forefront of clonal development in tea gardens.

AN

LOWER ASSAM

Brahmaputra

Tezpur

Nagaon

Rengma Hills

Guwahati

Dimapur

ASSAM

MEGHALAYA

NAGALAND

GUWAHATI

Most of the CTC tea produced in Assam goes to auction in Guwahati and is mostly bought for the domestic market.

Barail Range

MANIPUR

TRIPURA

MIZORAM

WILD DISCOVERY

The Assam tea plant (*Camellia sinensis* var. *assamica*) was first discovered growing wild in the hills of the Upper Assam region in 1823. It was later classified as a variety of *Camellia sinensis*, but has wider leaves than the *sinensis* variety.

Tea harvested during Assam's second flush is considered to have the best flavors because hot and wet growing conditions bring out the malty richness of the tea.
