

for aerospace, defence, industrial, and naval applications. Ideal for military aircraft, drones, radars, and avionics, these converters provide reliable power conversion with high efficiency. They support 12V-48V outputs, feature wide input voltage ranges, and allow load sharing up to 3kW. Built-in protections, low-noise performance, and a scalable architecture simplify integration.

Light-powered CO₂ sensor

Greotech has introduced Sensoco Loomair Solar, a light-powered CO₂ sensor for smart buildings. It uses

Epishine's indoor solar cell and e-peas' PMIC for continuous operation, eliminating the need for

disposable batteries. The sensor supports Mioty, Wireless M-Bus, LoRa, and Sigfox, ensuring seamless integration with building management systems. As demand for industrial IoT devices grows, energy harvesting solutions like Loomair Solar provide a sustainable alternative.

High-speed network transceiver

Fujitsu has launched the 1FINITY P300 800G ZR/ZR+ coherent pluggable transceiver, enhancing optical networking with high performance and efficiency.

Built with 3nm DSP technology, it reduces power consumption by 30%. Integrated with Virtuora network control, it enables seamless

multi-vendor management. Compliant with OIF ZR and Open ROADMSA, it supports future 1.6Tbps upgrades for evolving AI and cloud demands.

Gaming GPUs

ASUS has introduced the AMD Radeon RX 9070 and RX 9070 XT graphics cards for its TUF Gaming and Prime

series, featuring RDNA 4 architecture, 16GB VRAM, and HYPR-RX technology.

Designed for high-performance gaming, these GPUs offer AI-powered enhancements, improved ray tracing, and super-resolution upscaling. A 2.5-slot design, triple-fan Axial-tech cooling, and a phase-change GPU thermal pad ensure efficiency.

Square display with clear picture

DISPLAY VISIONS has launched the 4" TFT040-77AINN, a high-brightness (900cd/m²) square display ideal for industrial, medical, consumer, and automation applications. Featuring IPS technology, 720 × 720 resolution,

and an optional PCAP touch panel with optical bonding, it ensures durability and superior image quality. The display supports an 18-bit RGB interface, 3-wire SPI setup, and I²C for touch control. Operating from -20°C to +70°C, it suits rugged environments, making it perfect for engineers, OEMs, and embedded developers.

MANUFACTURING EQUIPMENT

X-Ray inspection systems

Glenbrook's RTX series provides advanced X-ray inspection systems for PCB components, medical devices, and electronic packaging, offering customisable solutions that ensure seamless integration, long-term reliability, and high-resolution imaging for precise quality control. Designed for high-volume production, the RTX-113 inspects multilayer PCBs using Glenbrook's patented X-ray technology.

Ultrasonic cleaning for conformal coating

Nordson Electronics Solutions introduces the ASYMTEK Select Coat SL-1040 Ultrasonic Cleaning Station

(patent pending) to prevent nozzle and needle clogging in conformal coating operations. Designed for electronics, automotive, aerospace, medical, and industrial manufacturing, it benefits engineers and operators by reducing downtime and ensuring consistent application.

AOI solution for THT assembly

GOEPEL electronic introduces multi line assist, an AOI module enhancing THT assembly by providing guided placement and real-time inspection. Despite automation, manual work remains vital for small batches and
