India, China Propel Global IoT Module Market Growth

Global cellular IoT module shipments grew 10% YoY in 2024, rebounding after a decline in 2023 with China and India leading the recovery. The growth in India (31%) was driven by smart meters and tracking applications. Quectel and Fibocom face geopolitical challenges in international markets, with Quectel being added to the US 1260H list. Cat 1 bis emerged as the fastest-growing technology in 2024, surging 100% YoY, whereas NB-IoT and Cat 1 declined sharply by 34% and 51% YoY, respectively. The fierce competition in the cellular market has substantially consolidated that segment.
