

India halts \$23 billion PLI scheme, seeks alternatives

India has decided not to extend its \$23 billion Production-Linked Incentive scheme, launched to reduce reliance on China. Despite 750 companies joining, including Foxconn and Reliance, targets were unmet and payouts were slow. The government plans to provide alternative support for key sectors including pharmaceuticals, mobile phones, and solar energy.

RRP Electronics plans ₹240 billion fab and ₹120 billion OSAT unit in Maharashtra

RRP Electronics is set to open a ₹240 billion semiconductor fab and a ₹120.35 billion OSAT facility in Maharashtra, partnering with global firms like Deca Technologies. The company aims to create 4000 jobs following the inauguration of its milestone semiconductor equipment facility in Navi Mumbai, which is backed by Sachin Tendulkar and the Maharashtra government.

Telangana's four ₹105.74 billion EMC projects break ground

Union Minister Ashwini Vaishnaw launched four electronics manufacturing units in Telangana's Divitipally, marking the foundation of Amara Raja's gigafactory and other plants for Lohum, Scell Energy, and Altmin. With an investment of ₹105.74 billion, these projects aim to create 19,200 jobs and support India's growing electronics and electric vehicle sectors.

Madhya Pradesh secures ₹25.64 billion investments at IT Summit

Madhya Pradesh is eyeing investments worth ₹25.64 billion, aimed at creating 183,400 jobs. The major deals signed at a recent tech summit include Kaynes Technology's ₹3.52 billion SMT manufacturing plant at Bhopal IT Park, ₹10-12 billion from ELCINA for electronics manufacturing, and ₹5 billion from Tholons Inc. for GCCs. Other significant investments included ₹40 billion from Shree Tech Data Limited for GCCs and data centres and ₹1.45 billion from Prakhar Software Solutions for the drone sector, leading to 10,000 jobs.

Nokia boosts exports from India and eyeing further growth

Nokia is ramping up exports from India, shipping 30-70% of production abroad, driven by the government's PLI scheme. India remains a key market, with 50% of radio equipment exports last year. The company's R&D, 5G, and satellite broadband initiatives, along with a strong workforce and financial performance, would boost future growth.

India begins exporting Apple components to China and Vietnam

India has started exporting electronic components such as enclosures to China and Vietnam for Apple products

An "AWESOME" Development Board from India?

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors
(Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
